I. Introduction

Providing safe, abundant drinking water to Missourians requires almost continuous infrastructure additions and improvements. Since the program's inception, the Drinking Water State Revolving Fund (SRF) has been one of Missouri's primary funding sources for making investments in communities and the future of our state. The Drinking Water SRF program, managed by the Missouri Department of Natural Resources' Financial Assistance Center (FAC), on behalf of the Safe Drinking Water Commission (SDWC), makes low-interest loans to communities to help them meet their drinking water needs. The Department is committed to protecting Missouri's water resources that are so important to public health and its economy.

This report details the activities undertaken to reach the goals and objectives set forth in the Intended Use Plan (IUP) developed for 2021. It also describes progress made toward long and short term program goals, the sources and uses of all funds, financial status of the Drinking Water SRF program, and compliance with federal requirements.

II. Executive Summary

This report addresses operation of the Drinking Water SRF program during the reporting period from October 1, 2020, through September 30, 2021, Federal Fiscal Year (FFY) 2021.

Missouri's Drinking Water SRF program was awarded \$19,394,000 in Environmental Protection Agency (EPA) capitalization grants during the reporting period. Missouri made three direct loans totaling \$7,162,000 and twelve SRF grants totaling \$3,003,000 during the reporting period. During this reporting period, no pooled leveraged loan closings occurred.

The Water and Wastewater Loan Revolving Fund (Fund 0602) was established to receive loan repayments, which are then used to make new loans. As of September 30, 2021, the Water and Wastewater Loan Revolving Fund had a balance of \$90,906,450. The Drinking Water SRF capitalization grant balance for Drinking Water SRF projects was \$37,499,414 as of September 30, 2021. The EPA capitalization grant balance related to the Drinking Water set-asides was \$12,057,643 as of September 30, 2021. The Drinking Water SRF capitalization grant balance total was \$49,557,057.

Since inception, Missouri's Drinking Water SRF program was awarded a total of \$436,116,331 in EPA capitalization grants and amendments through September 30, 2021. This amount includes an in-kind amount of \$1,444 on the FS997629-00 grant and an in-kind amount of \$100,000 for each of the FS997629-06 and FS997629-08 grants, and \$74,397 on the FS997629-11 grant. During State Fiscal Year (SFY) 2013, \$18,500,000 of Drinking Water SRF capitalization grant funds were transferred to the Clean Water SRF program. FS997629-07, FS997629-08, FS997629-09 and FS997629-10 Drinking Water SRF capitalization grants were amended to reflect this transfer of capitalization grant funds. In FFY 2014, \$5,000 was rescinded from the Drinking Water SRF capitalization grant. These amounts are not available to be drawn.

The Drinking Water SRF program has contributed state match of \$75,772,591, which included \$15,504,549 of state appropriations, \$42,276,597 of revenue bonds, \$7,085,242 of funds

contributed through rural water grants and a transfer of \$10,906,203 from the administration fee fund. Since inception of the program, the State of Missouri has made 73 leveraged loan commitments totaling \$250,735,000; 83 direct loan commitments totaling \$188,346,200; and 69 grant commitments totaling \$58,357,334.

Following is a list of all the Drinking Water SRF capitalization grant awards from the inception of the program through the 2021 reporting period.

Drinking Water SRF Capitalization Grants		
Drinking Water SRF Federal Fiscal Year	Award Amount	Cumulative
1997	\$21,856,417	\$21,856,417
1998	\$9,572,970	\$31,429,387
1999	\$10,034,771	\$41,464,158
2000	\$10,429,700	\$51,893,858
2001	\$10,472,900	\$62,366,758
2002	\$11,702,600	\$74,069,358
2003	\$11,633,700	\$85,703,058
2004	\$12,066,800	\$97,769,858
2005	\$12,041,273	\$109,811,131
2006	\$15,978,200	\$125,789,331
2007*	\$15,978,000	\$141,767,331
2008*	\$15,816,000	\$157,583,331
2009*	\$15,816,000	\$173,399,331
2010*	\$26,234,000	\$199,633,331
ARRA	\$37,862,000	\$237,495,331
2011	\$18,204,000	\$255,699,331
2012	\$17,348,000	\$273,047,331
2013	\$16,277,000	\$289,324,331
2014**	\$17,850,000	\$307,174,331
2015	\$17,738,000	\$324,912,331
2016	\$16,781,000	\$341,693,331
2017	\$16,637,000	\$358,330,331
2018	\$19,582,000	\$377,912,331
2019	\$19,399,000	\$397,311,331
2020	\$19,411,000	\$416,722,331
2021	\$19,394,000	\$436,116,331

*The original grant amount is listed in this table. These grants were amended.

**This grant amount reflects the federal rescission.

Following is a summary of Drinking Water SRF binding commitments. The cumulative total of Drinking Water SRF binding commitments as of September 30, 2021, is \$497,438,534. The Drinking Water SRF program has never had a recipient default on any loan.

Binding Commitment Summary	
Cumulative Binding Commitments	Amount
Leveraged Loans	\$250,735,000
Direct Loans (excludes Loans Paid with Leveraged Loans)	188,346,200
ARRA Grants	18,948,152
SRF Grants	39,409,182
Total Binding Commitments	\$497,438,534

III. 2021 Binding Commitments

The Department entered into three direct loan commitments as well as twelve grant commitments totaling \$10,165,000 during the reporting period.

Missouri typically provides additional subsidization as grant due to the state's statutory requirement that municipalities utilize bond authority to accept principal forgiveness or negative interest subsidies. However, after passage of the America's Water Infrastructure Act (AWIA) in 2018, the Department is required to make additional subsidies available through principal forgiveness rather than grant with a specified percentage of its capitalization grant, beginning with the 2019 capitalization grant. During this reporting period, program funds were committed to eligible projects through a combination of up to 50 percent grant and the remaining portion as a loan with a maximum grant of \$2,000,000 per recipient. Disadvantaged communities were eligible for additional subsidization in an amount up to 75 percent of the project with a maximum grant of \$2,000,000 per recipient.

Drinking Water SRF Direct Loans and Disadvantaged Grants for FFY 2021					
Recipient	Total Amount	Loan Amount	Grant Amount	Award Date	Project #
Carrollton	\$4,181,000	\$4,181,000	\$ -	11/10/2020	DW291368-01
Pierce City	4,736,000	2,736,000	2,000,000	11/13/2020	DW291345-01
Centertown	978,000	245,000	733,000	02/24/2021	DW291337-02
2021 Total	\$9,895,000	\$7,162,000	\$2,733,000		

Drinking Water SRF Engineering Report Grants for FFY 2021			
Recipient	Grant Amount	Award Date	Project #
Osage Co. PWSD No. 3	\$ 17,000	07/01/2021	DER-101-21
Anderson	30,000	07/29/2021	DER-102-21

Belle	30,000	09/21/2021	DER-100-21
2021 Total	\$270,000		

IV. Cumulative Binding Commitments

Exhibit 1 provides a listing of the binding commitments since the inception of the program. The cumulative total Drinking Water SRF binding commitments on September 30, 2021, was \$497,438,534.

Since the inception of the Drinking Water SRF program, 225 binding commitments have been made. Of the 225 binding commitments entered into, 73 were leveraged loans, 83 were direct loans and 69 were grants. Three interim direct loans, which are not included in the binding commitment totals, were repaid and replaced with a leveraged loan.

The innovative financing provided through the Drinking Water SRF program allows communities to save a considerable percentage of the interest cost of conventional loans. To date, Missouri's Drinking Water SRF program has saved communities an estimated \$135,448,760 in lower interest compared to the higher interest rates of conventional financing. Additional subsidization through the Drinking Water SRF program has saved communities an estimated \$58,357,334.

V. Drinking Water SRF Applications and Loans Awarded

Following is a summary of the number of new and carryover Drinking Water SRF applications for the 2021 reporting period. This information was taken from the IUP for FFY 2021.

Drinking Water SRF Applications	
Projects Accepted	FFY 2021
Number of New Projects	13
Number of Carryover Projects	7
Total Number of Projects	20
Total Amount Requested of New Projects	\$33,123,258
Total Amount Requested of Carryover Projects	\$18,572,218
Total Amount Requested of Projects	\$51,695,476
Total Population Served for New Projects	28,545
Total Population Served for Carryover Projects	5,251
Total Population Served	33,796

The table below summarizes the number of projects approved, the amounts of the loans, grants and the total population served for those projects.

Drinking Water SRF Loan Projects Approved and Loans Awarded	FFY 2021
Number of Projects Approved	13
Total Amount of Loans Closed	\$7,162,000
Total Amount of Grants Closed	\$3,003,000
Total Population Served	21,486

The following table shows the cumulative Drinking Water SRF leveraged loan closings since the beginning of the program.

Cumulative Drinking Water SRF Leveraged Loans				
Bond Pool	Number of Loans	Total Loan Amount	Average Subsidized Interest Rate + 0.5 Administration Fee	Cumulative Amount
1998A	2	\$28,795,000	3.58%	\$28,795,000
1999A	1	\$2,315,000	3.57%	\$31,110,000
1999B	2	\$4,320,000	4.07%	\$35,430,000
2000A	6	\$20,490,000	4.01%	\$55,920,000
2000B	4	\$6,810,000	3.87%	\$62,730,000
2001A	4	\$6,295,000	3.43%	\$69,025,000
2001C	7	\$23,400,000	3.95%	\$92,425,000
2002A	4	\$10,370,000	2.93%	\$102,795,000
2002B	4	\$26,705,000	2.93%	\$129,500,000
2003B	4	\$11,445,000	2.68%	\$140,945,000
2003C	5	\$11,290,000	2.20%	\$152,235,000
2004B	2	\$3,605,000	2.13%	\$155,840,000
2004C	5	\$9,720,000	2.13%	\$165,560,000
2005A	3	\$28,105,000	2.27%	\$193,665,000
2005C	4	\$29,780,000	1.84%	\$223,445,000
2006A	3	\$2,000,000	2.05%	\$225,445,000
2006B	1	\$2,295,000	2.08%	\$227,740,000
2007A	6	\$11,805,000	1.83%	\$239,545,000
2007B	1	\$385,000	2.01%	\$239,930,000
2008A	5	\$10,805,000	2.13%	\$250,735,000

The table below summarizes the cumulative Drinking Water SRF direct loans since the program moved to cash flow direct loans.

Cumulative Drinking Water SRF Cash Flow Direct Loans				
Period Ending	Number of Loans	Total Loan Amount	Average Subsidized Interest Rate + 0.5 Administration Fee	Cumulative Amount
June 30, 2008	1	\$4,163,000	1.90%	\$4,163,000
June 30, 2009	1	\$2,900,000	2.23%	\$7,063,000
June 30, 2010	21	\$24,426,700	1.99%	\$31,489,700
June 30, 2011	5	\$2,692,900	2.37%	\$34,182,600
June 20, 2012	6	\$12,344,000	2.24%	\$46,526,600
June 30, 2013	9	\$7,153,600	2.08%	\$53,680,200
Sept. 30, 2014	6	\$30,090,000	2.03%	\$83,770,200
Sept. 30, 2015	7	\$7,893,000	1.82%	\$91,663,200
Sept. 30, 2016	6	\$53,540,000	1.61%	\$145,203,200
Sept. 30, 2017	8	\$19,051,000	1.66%	\$164,254,200
Sept. 30, 2018	4	\$3,334,000	1.68%	\$167,588,200
Sept. 30, 2019	2	\$3,003,000	1.51%	\$170,591,200
Sept. 30, 2020	4	\$10,593,000	1.34%	\$181,184,200
Sept. 30, 2021	3	\$7,162,000	1.30%	\$188,346,200

VI. Objectives and Goals of the Drinking Water State Revolving Fund

Each year the Department evaluates the operations and the financial structures of the SRF program to gauge program effectiveness. This evaluation includes a qualitative assessment of the Department's progress toward meeting long and short term goals established in the FFY 2021 IUP.

Long Term Objectives and Goals

In order to meet the long term objectives of improving the Drinking Water SRF's operations and services to its clients, the Department developed the following goals:

1. Provide assistance to projects that protect public health by ensuring Missouri citizens served by public water supplies will have water that is safe to drink.
2. Provide assistance to projects that increase the long-term sustainability of existing and proposed water systems, and encourage projects to consolidate, interconnect, or regionalize drinking water systems.
3. Maintain the long-term integrity of the revolving fund by applying prudent financial standards to assistance provided to participants.
4. Encourage systems to choose projects with the most cost-effective solutions.
5. Protect source water for drinking water systems.

6. Manage projects and work efficiently with participants to ensure projects proceed toward a binding commitment in a timely manner.
7. Continue to implement and enhance the Department's Capacity Development Program, which implements a strategy to improve the technical, managerial, and financial capacity of Missouri's public water systems. Additional information is available at dnr.mo.gov/env/wpp/cap-dev.htm.

Short Term Objectives and Goals

In order to meet the short term objectives of improving the immediate operations and the availability of services to its clients, the Department developed the following goals:

1. Implement a marketing strategy focused on recruiting large projects to increase use of the DWSRF program.
2. Utilize additional subsidization incentives to assist disadvantaged communities and regionalization projects.
3. Plan and implement a programmatic financing structure that offers a reliable funding mechanism for entities with significant capital spending needs.
4. Have the DWSRF priority point criteria (Appendix 5) and readiness-to-proceed criteria (Appendix 6) updated and approved by the Missouri SDWC in fall 2020, prior to the application receipt deadline (March 1, 2021).

VII. Progress Toward Achieving Objectives and Goals

This section of the annual report describes the progress that has been made in meeting those long and short term objectives and goals for the period from October 1, 2020, to September 30, 2021.

Progress Toward Meeting the Long Term Objectives and Goals

Goal 1: Provide assistance to projects that protect public health by ensuring Missouri citizens served by public water supplies will have water that is safe to drink.

The Department continues to meet this objective by providing affordable financing to public water systems for drinking water infrastructure improvements. These improvements allow public water systems to continue providing safe, clean and abundant drinking water to the citizens of Missouri. Department project managers market the program and assist each applicant to successfully navigate the SRF process and reach a binding commitment. During the reporting period, thirteen projects entered into funding commitments.

The Department's Public Drinking Water Branch (PDWB) continues to provide oversight of all public water systems in the state to promote compliance with the Safe Drinking Water Act (SDWA). The PDWB uses set-aside funding to assist public water systems with compliance and public health issues by implementing and administering activities described in Section VIII of this report.

Goal 2: Provide assistance to projects that increase the long-term sustainability of existing and proposed water systems, and encourage projects to consolidate, interconnect, or regionalize drinking water systems.

The Department's SRF staff work with PDWB staff to identify small and struggling systems and encourage funding options that promote system sustainability, with an emphasis on regionalization and consolidation.

The Department's priority point criteria is designed to allocate funding to eligible projects that address the most serious risks to human health, ensure compliance with requirements of the Safe Drinking Water Act, and assist systems most in need. This ensures funding of those most-needed projects. Staff evaluates each applicant's TMF capacity, and provides coaching during project development that improves each applicant's TMF knowledge and capacity.

The Department works with each applicant as their project is developed to evaluate all appropriate alternatives, and interconnection or regionalization must be considered. Staff then works with the applicant to select the method that best addresses the system's drinking water needs in a manner that enhances long term sustainability.

Goal 3: Maintain the long-term integrity of the revolving fund by applying prudent financial standards to assistance provided to participants.

The Department utilizes a robust credit evaluation process. All applicants are required to provide a completed due diligence questionnaire that includes a variety of information, including 3-5 years of financial history and a user rate analysis. Department technical and financial staff review all submittals to verify that the applicant has a sound financial capacity and that projected future revenue is sufficient to address both operation and maintenance and debt service.

Goal 4: Encourage systems to choose projects with the most cost-effective solutions.

The Department coordinates with applicants throughout the project development process, thoroughly reviews the facility plans and scopes of work for each project, and provides input to encourage the most cost-effective solutions.

Goal 5: Protect source water for drinking water systems.

The Department's priority point criteria awards points for projects that include source water protection. The Department uses set-asides to protect source water for public drinking water systems through a grant available to community water systems to plug abandoned wells that pose a threat to the drinking water aquifer.

Goal 6: Manage projects and work efficiently with participants to ensure projects proceed toward a binding commitment in a timely manner.

Department project managers work closely with participants to ensure compliance with funding requirements, timely submittal of required documents in a complete manner, and that projects stay on track. The Department has improved a number of forms resulting in less incomplete information and missing documents. The Department began accepting electronic submittals of different documents, which reduces processing time. The Department is also in the process of

developing standard operating procedures to ensure consistent project review.

Goal 7: Continue to implement and enhance the Department's Capacity Development Program, which implements a strategy to improve the technical, managerial, and financial capacity of Missouri's public water systems. Additional information is available at dnr.mo.gov/env/wpp/cap-dev.htm.

The Department assists applicants with the review of their operations, financial stability, infrastructure needs, and ability to maintain or achieve compliance with Drinking Water Regulations.

The PDWB uses set-aside funding to develop, update, and implement Missouri's Capacity Development Strategy, which is a comprehensive plan for assisting all public water systems with their TMF viability. The PDWB evaluates the TMF capacity of new community and nontransient-noncommunity systems to ensure they can provide safe and adequate drinking water over the long term.

Progress Toward Meeting the Short Term Objectives and Goals

Goal 1: Implement a marketing strategy focused on recruiting large projects to increase use of the DWSRF program.

The Department hosted two webinars on SRF funding opportunities for drinking water and wastewater treatment systems. These workshops, attended by more than 100 local leaders statewide, described how to plan, pay for, and build water infrastructure projects using financial assistance from state and federal agencies, and are expected to attract applicants.

Though conferences were not as common in FFY 2021 as in years prior, the Department was still able to attend one regional conference to reach stakeholders directly and present program information.

The Department also funds facility plans for small communities through the Drinking Water and Wastewater Engineering Report Grant programs. These reports mark the first step towards completing an infrastructure project and add to the pipeline of new applicants for the SRF program. These grants also build relationships early in the planning process between the Department and communities with funding needs.

To make all Department functions more accessible to our stakeholders the agency completed an extensive overhaul of our website. This revamp included a total redesign of the SRF program's webpage, which will allow interested borrowers to find information about the program more easily.

To open the SRF program to cash-limited borrowers, the Department designed and piloted a new drinking water planning and design loan program. This program will help communities pay early design costs incurred prior to SRF construction loan closing, and will alleviate another source of hesitancy to approaching the SRF program.

Goal 2: Utilize additional subsidization incentives to assist disadvantaged communities and regionalization projects.

The Department offered Engineering Report Grants through the Drinking Water SRF for the first time in October 2020. Engineering Report Grants were previously funded by set-aside funding. The grant is available for municipalities, counties, public sewer district, and water districts with a population of fewer than 3,300 residents for engineering costs to prepare a facility plan. Larger systems developing a plan to serve a system with a population of 3,300 or less may also apply. Eligible applicants can submit an Engineering Report Grant application to the Department at any time.

Goal 3: Plan and implement a programmatic financing structure that offers a reliable funding mechanism for entities with significant capital spending needs.

The Department remains in the research and information gathering stage of programmatic financing. This will remain a goal for the coming years, depending on the demands to implement new funding programs in relation to the American Rescue Plan Act and the Infrastructure Investment and Jobs Act.

Goal 4: Have the DWSRF priority point criteria (Appendix 5) and readiness-to-proceed criteria (Appendix 6) updated and approved by the Missouri SDWC in fall 2020, prior to the application receipt deadline (March 1, 2021).

This objective was accomplished on October 14, 2020.

VIII. Set-Aside Activities

When Congress established the Drinking Water SRF program in 1996, it included special provisions called “set-asides” to help states achieve the public health protection objectives of the SDWA. The set-asides provide funding to enhance state public drinking water programs and assist systems with non-infrastructure needs.

The SDWA establishes four categories of set-asides and sets limits on the maximum percent of the capitalization grant. States may reserve up to 31 percent of each year’s capitalization grant to support the primacy program, implement source water protection and capacity development activities, and provide technical and financial assistance to water systems. The PDWB administers these set-asides. Listed below are each of the set-asides and the related activities the Department funded during this period.

Administration and Technical Assistance Set-Aside (4 percent)

The SDWA allows states to use up to 4 percent of each capitalization grant for administration of the programs established under SDWA §1452 (Drinking Water SRF programs) and for technical assistance to public water systems of any size. The Department reserved the entire authorized 4 percent allowed for this set-aside and used it for costs of administering the loan program. The Department will reserve any unused amounts of the set-aside authority for future set-aside expenditures.

Costs associated with administering the Drinking Water SRF loan program included paying salaries and associated expenses of program personnel administering the loan program. In the time-frame covered by this report, the Department used this set-aside to assist applicants and loan recipients, review projects, assistance with the needs survey, prioritize projects, issue loans,

track repayments, and perform project inspections. The Department also uses this set-aside for all expense and equipment such as personal protective equipment, office supplies, training, etc. for the Drinking Water SRF loan program staff.

Small System Technical Assistance Set-Aside (2 percent)

Operator Certification Vouchers

The Department issues drinking water training vouchers annually to approximately 1,500 community and nontransient noncommunity water systems serving 3,300 people or less. Water system personnel use vouchers to pay for operator certification fees and eligible drinking water training fees for existing operators or new personnel. Public water systems have flexibility to manage voucher use by determining who may use the vouchers, allowing public water systems to use the vouchers in a manner that best meets their needs. In FFY 2021, 626 certified operators representing 545 public water systems utilized vouchers. Uncertified individuals also used vouchers in an effort to become certified. The Department received \$193,375 in vouchers for processing.

Public Water System Supervision Program Management Set-Aside (10 percent)

PWSS Program Implementation

States can use up to 10 percent of each capitalization grant for the Public Water System Supervision (PWSS) program. The Department reserved the entire 10 percent of this set-aside to fund salaries and expenses associated with the implementation of the program, including monitoring, compliance assistance, enforcing public notice requirements, regulation development and implementation, plan review, and overall program administration. The Department reports to EPA annually on these activities through the Performance Partnership Grant annual report.

Capacity Development/TMF

The Department reports capacity development activities and accomplishments to EPA annually in the Department's annual State Capacity Development Program Implementation Report. In FFY 2021, the Department initiated efforts to update the Capacity Development Strategy for Existing Public Water Systems and held two Capacity Development Advisory Committee meetings to solicit feedback from stakeholders on proposed recommendations and modifications to the document.

Operator Certification

This set-aside funded salaries of staff that conduct trainings, proctor exams, revoke or suspend noncompliant operators, perform outreach and stakeholder activities, and provide general support for these activities. The Department reports operator certification activities and accomplishments to EPA in the Department's annual Operator Certification Report.

Local Assistance and Other State Programs Set-Aside (15 percent)

The SDWA allows states to set aside up to 15 percent of the Drinking Water SRF capitalization grant for the following activities:

- Create special loan programs for source water protection;
- Provide technical and financial assistance to public water systems as part of a capacity development strategy; and
- Establish and implement a wellhead protection program under Section 1428 of the SDWA.

For the period covered by this report, the Department set aside 15 percent from the capitalization grant to support capacity development, wellhead protection, and source water protection activities. The Department has not established a loan program for source water protection.

The Department funded the following activities with this set-aside during this reporting period:

- Contracts for circuit riders to provide training and technical assistance to water systems;
- Subawards to community water systems that use groundwater and plug abandoned wells that may threaten the aquifer;
- A cooperative agreement with the Missouri Geological Survey (MGS) for vulnerability assessment activities, casing depth determinations for public wells and updates to the Safe Drinking Water Inventory System; and
- A contract with the University of Missouri for maintenance of public water system source water assessment and delineation information.

Circuit Riders

In FFY 2021, the Department contracted with technical experts from MRWA, also known as circuit riders, to assist public drinking water systems facing TMF capacity challenges. Circuit riders provided assistance for water loss, rates and reserves, treatment, disinfection, asset management, distribution mapping, natural disasters, operator certification, and source water protection. They primarily focused their efforts on systems that had difficulty obtaining resources to achieve and maintain TMF capacity. During assistance visits, circuit riders often address more than one issue encountered at the system.

During FFY 2021, circuit riders provided 375 onsite and offsite assistance visits to 178 public water systems statewide. Requests for circuit rider assistance with water loss and financial assistance outpaced all other TMF capacity requests. In FFY 2021, 69 percent of the assistance provided was technical in nature, while managerial and financial assistance efforts were 11 and 20 percent, respectively.

To increase system knowledge of TMF capacity principles, circuit riders focus efforts on the correlation of water loss to rates and reserves. By linking water loss to revenue, systems learn about the technical aspects of locating and repairing a water leak, the managerial importance of documentation and budget keeping, and the financial benefit of reduced water loss.

Water Loss

Because of the high level of system interest in leak detection, the Department provided more water loss and leak detection efforts than any other circuit rider assistance. Water loss and leak detection visits assist systems in identifying nonrevenue water, including real or physical losses of water as well as apparent losses. Identification and reduction of nonrevenue water is a major component to achieving and maintaining TMF capacity.

Promptly repairing leaks can result in cost savings for systems by reducing electrical and chemical costs, equipment and repair costs, labor cost, and customer complaints. In FFY 2021, circuit riders performed 96 leak detection visits using specialized equipment. The repair of leaks resulted in approximately 55 million gallons of water saved over the reporting period and approximately \$27,500 in monthly electrical and chemical savings. Long-term leaks, or those that were known to have leaked for more than one month, totaled over 25 million gallons of lost water over the course of the leaks.

Rate Studies

Rate assistance helps water utility personnel and management understand the necessity of rate adjustments in order to ensure revenues cover the expenditures of the system. During a system visit to discuss rates and reserves, the circuit rider also discusses budgeting, asset inventory and management, and strategic planning. In FFY 2021, the circuit rider began rate assessments for 20 systems and concluded rate studies for 18 systems. After completion of the rate assessment, the circuit rider presents results to the water system decision makers, if desired by the system. During FFY 2021, three systems implemented new rates to cover necessary expenses and reserves because of a rate study. The rate adjustments ranged across the state from \$8.71 to \$15.85 per 5,000 gallons. Of the rate studies completed in FFY 2021, six systems were determined to have current rates so the circuit rider did not recommend a rate increase.

Wellhead and Source Water Protection

The Department funded wellhead and source water protection activities with set-asides in this reporting period. Groundwater-based community water systems serve more than 2.1 million Missouri residents. There is also an estimated 500,000 abandoned water wells across the state. These wells present a real and serious threat to Missouri's groundwater aquifers if not properly plugged. Since 2006, the Department has provided Abandoned Well Plugging grants to groundwater-based public water systems to plug more than 150 abandoned water wells located within public water system source water or service areas across the state. During FFY 2021, the Department offered a total of \$65,000 to groundwater-based water systems to plug nine abandoned wells through six awards.

Missouri Geological Survey

The MGS issued 38 estimated casing depth letters to community and nontransient-noncommunity systems and 19 final casing depth approval letters. MGS also conducts vulnerability assessment activities, and completed the Vulnerability Assessment Report in November of 2020. This report allows the Department to reduce the monitoring frequency for eligible chemicals.

The Department contracted with the University of Missouri's Center for Applied Research and Environmental Systems (CARES) to maintain public water system source water assessment and delineation information and to refine and revise the susceptibility determination assessments, which water systems can use to improve protections for the source of its drinking water. CARES maintains a public website with maps of Missouri public water systems, showing source water locations, potential contamination sites, and other data. In FFY 2021, the CARES website received more than 2,444 visits.

IX. Maintaining Drinking Water SRF Financial Assistance Programs

The Department operates a number of financial assistance programs for drinking water infrastructure.

Financial Assistance Programs

1. Direct Loan

The Department's primary financial tool to fund public drinking water improvements is the Drinking Water SRF Direct Loan program. For the 2021 reporting period, the Department reserved 69 percent of the annual capitalization grant for direct loans and grants (grants are discussed in the next paragraph). The subsidy rate for all loans awarded during this reporting period was 70 percent of the market interest rate. In this reporting period, the Department awarded \$7,162,000 in direct loans to three different drinking water systems. These loans all have a 20 year term.

2. Additional Subsidization

The FFY2021 Drinking Water SRF capitalization grant requires that at least 14 percent of the capitalization grant be used to provide additional subsidization to eligible recipients. In addition, America's Water Infrastructure Act (AWIA) of 2018 amended the SDWA to require states to provide loan subsidies, in the form of principal forgiveness or negative interest loans, to disadvantaged communities in an amount totaling between 6 percent and 35 percent of the capitalization grant awarded. For this reporting period, the Department reserved \$2,715,160 of the capitalization grant for additional subsidies in the form of Drinking Water SRF grants and \$1,163,640 in the form of principal forgiveness. Drinking Water SRF grant funds were awarded to eligible, non-disadvantaged communities' projects through a combination of up to 50 percent grant and a direct loan for the remaining project amount, with a maximum grant of \$2,000,000 per recipient. The Department offered a higher percentage grant for disadvantaged communities. A disadvantaged community is any community with a population of less than 3,300, whose user rates will be at or above 2 percent of the recipient median household income and the recipient median household income is at or below 75 percent of the state average as determined by the most recent decennial census. Projects for a disadvantaged community may be funded through a combination of up to 75 percent grant and 25 percent loan with a maximum grant of \$2,000,000 per recipient. In this reporting period, the Department awarded \$3,003,000 in grants to twelve different drinking water systems.

Order of Priority for Distribution of Loan and Additional Subsidization Funds

For this reporting period, the Department developed written criteria to prioritize the ranking of projects for loans and additional subsidization so that the most serious problems were given the highest priority. Consistent with the Federal SDWA, priorities are based on protection of public health, compliance, and household affordability. The SDWC annually approves the criteria after public review. Further, it is the Department's policy to prioritize financial assistance to communities that cannot otherwise afford conventional financing. To meet this goal, the Department uses the following criteria listed in order of priority:

1. Projects serving disadvantaged communities on any fundable list based on priority ranking in the order of highest ranking;
2. Projects on the Very Small Community 20 percent Reserve Fundable List based on priority ranking;
3. Projects on the Small Community 15 percent Reserve Fundable List based on priority ranking; and
4. Projects on the General Community 65 percent Reserve Fundable List based on priority ranking.

Available capitalization grant funds, state match revenues, interest earned, and additional subsidization funds for this reporting period were allocated to projects according to priority ranking.

Project Reviews

The application deadline for new 2021 projects was March 1, 2020 in order to receive first consideration for available grant and loan funds. However, applications are accepted at any time to maximize use of funds.

The Department reviews all applications for eligibility, ranks eligible projects and lists projects on the IUP. Eligible loan recipients are community water system. Projects include expenditures of a type that facilitate compliance with the SDWA and advance the public health purposes of the SDWA. In order to proceed to a binding commitment, the Department reviews the applicant's financial capacity, engineering documents, environmental documents, contracts and ordinances for compliance with state and federal requirements.

Small System Allotment

Section 640.107 of the Missouri Safe Drinking Water statute requires that the Drinking Water SRF program allocate a portion of available funds to small systems. Loans for systems serving less than 10,000 people must be given priority consideration for no less than 35 percent of the available funds. Loans for systems serving 3,300 people or less must be given priority consideration for at least 20 percent of the available funds.

As of the end of the 2021 reporting period, the Department has awarded a cumulative total of 156 drinking water loans and 69 grants to 223 different community public water supply systems for a total of \$497,438,534. Of the 225 loans and grants awarded, 122 loans and 64 grants were awarded to water systems serving populations of less than 10,000.

These 186 loans and grants totaled \$243,572,034, or approximately 49 percent of the total. Therefore, the amount of the SRF loan program funds awarded to systems serving less than 10,000 is above the minimum 35 percent required by the Missouri Safe Drinking Law, and well above the 15 percent minimum required by the Federal SDWA. Exhibit 1 summarizes the leveraged and direct loans awarded since the beginning of the program.

The following table summarizes the loans and grants awarded in this reporting period, including the need category related to each project.

Drinking Water SRF Loans & Grants Awarded in FFY 2021							
	Amount Awarded	Project Categories					
		Source	Treatment	Storage	Transmission	Planning	Other
Anderson	Grant: \$30,000					X	
Belle	Grant: \$30,000					X	
Carrollton	Loan: \$4,181,000				X		
Centertown	Loan: \$245,000 Grant: \$733,000			X	X		
Galt	Grant: \$30,000					X	
Highlandville	Grant: \$24,000					X	
Jasper	Grant: \$30,000					X	
Osage Co. PWSD No. 3	Grant: \$17,000					X	
Pierce City	Loan: \$2,736,000 Grant: \$2,000,000		X	X			X
Shelby Co. PWSD No. 1	Grant: \$30,000					X	
Strafford	Grant: \$30,000					X	
Sullivan Co. PWSD No. 1	Grant: \$24,000					X	
Westboro	Grant: \$25,000					X	
Total for 2021	Loan: \$7,162,000 Grant: \$3,003,000						

The following table provides a description of Drinking Water SRF projects awarded in this reporting period.

Drinking Water SRF Projects Approved in FFY 2021	
Water System Name Award Amount	Project Description
Carrollton \$4,181,000	The project consists of: replacing approximately 16,600 feet of 12-inch, 4,800 feet of 8-inch, 400 feet of 6-inch, and 220 feet of 4-inch polyvinyl chloride (PVC) pipe, valves, and appurtenances throughout the town. These improvements will replace the mains in the worst condition and create distribution system looping. The project includes the refinancing of the eligible portion of the Participant's Refunded Bonds issued to pay design costs of the project.
Pierce City \$4,736,000	<p>The project includes: Distribution Improvements. This portion of the project will consist of approximately 45,600 feet of 12, 8, 6, and 4-inch water main replacements. 430 feet of 30-inch main will be installed for chlorine contact time at Well No. 5. New meters will also be installed as a part of the project.</p> <p>Water Supply Improvements. This portion of the project will consist of replacing the existing control components, breakers, and the addition of new communication devices. Well house improvements include piping and electrical improvements as well as the addition of chlorine rooms. A generator will also be added at Well No. 4.</p> <p>Water Storage Improvements. This portion of the project will consist of repairs to the welds, hatches, safety devices, equipment, fittings, gauges, controls, wiring, electrical conduit, lighting, power connection, and ladders. A new inlet pipe will be constructed. The tank will also be sand blasted, cleaned, and painted. The painting of the school logo is not eligible for SRF reimbursement.</p>
Centertown \$978,000	<p>The project consists of: Distribution Improvements. This portion of the project consists of the replacement of approximately 1,080 feet of water mains throughout the Village and the connection of the new tower to the well and distribution system. This includes all required fittings, valves, hydrants, service connections, and other necessary appurtenances. A new well pump, motor column piping, motor cable, air lines, check valves, and all appurtenances will be installed at the existing well as a part of this portion of the project.</p> <p>Storage Improvements. This portion of the project consists of constructing a new 60,000 gallon elevated spheroid storage tank. Only the cost for a 50,000 gallon tank was determined to be an eligible cost so the participant will pay the cost difference between the two tank sizes.</p>

X. EPA Recommendations on Performance Evaluation Report/Annual Program Review

Staff from EPA Region 7 conducted a virtual program evaluation of the FFY 2020 Drinking Water SRF program on June 15 through June 17, 2021. The final program evaluation report for the SRF program included the following recommendations and observations:

1. The Annual Report was received on December 31, 2020. EPA Region 7 commends Missouri for the timely submission of the FY 2020 Annual Report and for their commitment of annual independent audits.
2. Missouri has taken many steps to improve pace and based on estimated loans over the next 3 years, it's going to take years to reach compliance to timely use of funds. Although EPA Region 7 recognizes the efforts of Missouri's dedicated DWSRF staff, we remain concerned about loan pace, because of the potential for increased SRF funding. Missouri will continue to provide EPA updates to their plan to improve loan pace semiannually.
3. Marketing is a priority for Missouri's DWSRF. Missouri has conducted 4 years of financial workshops and will continue this next year.
4. Region 7 appreciates Sara Pringer sharing updated results of the modeling scenario from Missouri's SRF-specific cash flow management modeling program. The model shows that the Missouri's DWSRF could loan an average of \$102 million per year over the next 5 years.
5. MoDNR's project files were well organized and no improper payments were found during the cash draw transaction testing review.

XI. Proposed Improvements

The Department's FAC engages in continual marketing efforts intended to communicate the benefits of the Drinking Water SRF program. The Department also continues to evaluate the program's administrative procedures to streamline processes and improve customer service.

XII. Policy Summary

The Department has implemented regulations and policies to ensure the long term fiscal health of the Drinking Water SRF program, attain and maintain compliance with the SDWA, and carry out other provisions of the law. The Department protects the financial health of the Drinking Water SRF program by reviewing the creditworthiness of applicants, attaining proper surety and cross-collateralization.

- Water Protection Program's FAC and the EIARA review the creditworthiness of applicants to make sure they can safely meet their obligations in the loan program.
- As a form of surety, publicly-owned entities must offer revenue or general obligation bonds. Privately-owned entities may offer other appropriate forms of surety. To date, the

Department has not entered into loan agreements with privately-owned systems.

- The Drinking Water SRF program is cross-collateralized with the Clean Water SRF program as authorized by federal (P.L. 105-66) and state law (section 644.122, RSMo).

The Department attains and maintains compliance with the SDWA by setting priorities and reviewing projects.

- As previously addressed, priorities for projects funded through the loan program are approved annually by the SDWC after public review. The resulting criteria express priorities as a point system by which the Department ranks loan applicants. The Department awards points to projects that address SDWA compliance, public health, affordability on a per household basis, and security issues.
- The Department reviews all applicants for eligibility and assigns priority points before issuing its IUP. Before loan closing, the Department reviews the applicant's engineering documents, environmental documents, contracts, creditworthiness, bond covenants, and ordinances for compliance with state and federal requirements.

The Department's review achieves other purposes of the law by providing technical assistance and coordinating with other funding programs.

- The funding order of projects may not be identical to the fundable priority ranking in the annual IUP. Readiness to proceed is an important factor; however, the general order of project ranking will be followed to the extent a project progresses to a binding commitment. The Department encourages projects to proceed in a timely manner.
- The Department, with approval of the SDWC, may bypass any project on the fundable priority list that is not, in the opinion of the Department, making satisfactory progress toward satisfying requirements for Drinking Water SRF program assistance. Rules governing bypass procedures appear in 10 CSR 60-13.020(3)(A).
- Any project on the fundable priority list may be bypassed if the applicant fails to submit the documents required for Drinking Water SRF assistance at least 60 days prior to the beginning of the quarter for which the assistance is anticipated. Furthermore, the Department may develop schedules to determine whether a Drinking Water SRF project is making satisfactory progress. A project may be bypassed for failure to meet the schedule.
- A project that is bypassed will be removed from the fundable priority list, and if the application is still valid, will be placed on a project list, in priority order, for funding consideration in the next FFY.
- The Department uses authorized set-asides to fund staff that provide technical assistance related to SDWA compliance and the TMF capacity of water systems.
- The Department coordinates with other agencies that fund water system improvements

including the Missouri Department of Economic Development, which operates the Community Development Block Grants Program, and the U.S. Department of Agriculture Rural Development. The Department is continuing to try to address the needs of disadvantaged communities by supplementing Drinking Water SRF loans with other sources of funding.

XIII. State Match

In accordance with federal Safe Drinking Water statutes, states are required to provide a match equal to 20 percent of the total capitalization grant. Each state must deposit its match on or before the date of the grant payment. Further, it must make binding commitments equal to the grant minus set-asides plus match within one year of receiving the grant payment, except for the grant of FFY 1997. Through SFY 2003, the Department used general revenue funds to provide the required 20 percent match.

Beginning in SFY 2004, state match was provided through the proceeds of the sale of EIERA bonds. EIERA bonds are sold to generate 100 percent of the project costs and an appropriate percentage of those bonds are clearly identified as state match.

In 2007 and 2012, the state of Missouri issued general obligations bonds for infrastructure projects to improve water quality throughout the state. Of this, \$7,085,242 was distributed as rural water grants for use as state match.

XIV. Details of Activities

Fund Financial Status

1. 2021 Binding Commitments

Exhibit 1 is a complete binding commitment list. The following table lists the projects that began construction during the 2021 reporting period.

FFY 2021 Project Construction Start Dates			
Name	Project #	Construction Start Date	Award Amount
Pierce City	DW291345-01	1/04/2021	\$4,736,000
Carrollton	DW291368-01	02/17/2021	\$4,181,000
Centertown	DW291337-02	03/15/2021	\$978,000

2. Cash Draw Ratio (Proportionality)

Missouri used “cash flow” direct loans for the Drinking Water SRF program during the 2021 reporting period. The federal capitalization grant was not used as security for the state match bonds. In this reporting period, the state match funds for the Drinking Water capitalization grant were utilized first before drawing any federal funds from that grant. Once state match funds were utilized,

the cash draws were 100 percent federal funds. With taking the state match funds into consideration, the cash draw ratio was 83.33 percent federal funds and 16.67 percent state match. This process followed EPA memorandum, Clarification of Cash Draw Rules for Leveraged SRF programs (August 26, 2011).

3. Green Project Reserve

The costs associated with green project reserve components have been applied to the FFY 2010 and FFY 2011 capitalization grants; however, the FFY 2011 capitalization grant was the last year green project reserve was required, as shown in the following table. Green project reserve was not a grant requirement in subsequent capitalization grants.

Federal Fiscal Year	GPR Requirement	GPR Awarded
2010	\$5,246,800	\$5,246,800
2011	\$3,640,800	\$3,640,800

The following projects were identified to have green project reserve components and the associated costs were applied toward the FFY 2010 capitalization grant green project reserve requirement.

Project ID	Recipient Name	Loan Date	Loan Amount	GPR Amount	Water Efficiency
DW291228-01	Barry County PWSD #2	06/22/2011	\$ 564,000	\$ 419,925	\$ 419,925
DW291234-01	City of Clarksburg	10/05/2011	748,000	458,762	458,762
DW291308-01	City of Neosho	12/19/2011	9,425,000	2,030,200	2,030,200
DW295258-01	City of Desloge	09/27/2012	1,564,000	1,564,000	1,564,000
DW291293-01	City of Warsaw	11/28/2012	1,478,000	773,913	773,913
	Total		\$13,779,000	\$5,246,800	\$5,246,800

The following projects were identified to have green project reserve components and the associated costs were applied toward the FFY 2011 capitalization grant green project reserve requirement.

Project ID	Recipient Name	Loan Date	Loan Amount	GPR Amount	Water Efficiency
DW291293-01	City of Warsaw	11/28/2012	\$1,478,000	\$ 704,087	\$ 704,087
DW291322-01	Jefferson County PWSD #8	11/29/2012	520,000	520,000	520,000
DW291162-04	City of Linn	01/30/2013	2,260,620	943,128	943,128
DW291324-01	Jefferson County PWSD #12	05/22/2013	1,732,000	1,473,585	1,473,585
	Total		\$5,990,620	\$3,640,800	\$3,640,800

4. Additional Subsidy

The following table lists the additional subsidy requirements for each drinking water capitalization grant and the progress toward meeting the requirements.

Federal Fiscal Year	Minimum Required	Maximum Allowed	Planned Amount	Awarded	Fully Disbursed?
2010	\$5,430,438	\$18,101,460	\$7,870,200	\$7,870,200	Yes
2011	5,461,200	unspecified	5,461,200	5,461,200	Yes
2012	3,469,600	5,204,400	5,204,400	4,990,830	Yes
2013	3,255,400	4,883,100	4,883,100	4,694,571	Yes
2014	3,571,000	5,356,500	3,828,073	3,828,073	Yes
2015	3,547,600	5,321,400	3,547,600	3,547,600	Yes
2016	3,356,200	3,356,200	3,356,200	3,356,200	No
2017	3,327,400	3,327,400	3,327,400	3,327,400	No
2018	3,916,400	3,916,400	3,916,400	1,847,178	No
2019	3,879,800	3,879,800	3,879,800	-	No
2019-AWIA*	1,163,940	6,789,650	5,491,869	-	No
2020	2,717,540	2,717,540	2,717,540	-	No
2020-AWIA*	1,164,660	6,793,850	1,164,660	-	No
2021	2,715,160	2,715,160	2,715,160	-	No
2021-AWIA*	1,163,640	6,787,900	1,163,640	-	No
Total	\$48,139,978	\$79,150,760	\$58,527,242	\$38,923,252	

* America's Water Infrastructure Act (AWIA) of 2018 went into effect with the 2019 Capitalization grant and requires the state to make loan subsidies to disadvantaged communities, in addition to the additional subsidy that is required by Congress as stated in the Congressional Appropriations.

The Department has issued additional subsidization in an amount to meet the requirements of the FFY 2010 – 2017 capitalization grants. The following table lists the recipients who have been awarded additional subsidization, all in the form of grants.

Recipient	Amount Awarded	Award Date
Barry County PWSD No. 2	\$282,000	06/22/2011
Osage County PWSD No. 3	693,000	07/21/2011
Cass County PWSD No. 10	333,684	09/30/2011
City of Clarksburg	340,000	10/05/2011
Cass County PWSD No. 11	534,000	06/06/2012
Platte County PWSD No. 3	1,028,000	06/12/2012
City of Rogersville	559,113	08/24/2012
Jefferson County Water Authority	751,000	09/06/2012
City of Poplar Bluff	1,324,000	09/07/2012

Recipient	Amount Awarded	Award Date
City of Desloge	782,000	10/04/2012
Jefferson County PWSD No. 8	260,000	12/06/2012
City of Warsaw	739,000	12/20/2012
City of Linn	1,064,491	02/22/2013
Jefferson County PWSD No. 12	836,624	05/22/2013

Assembled Necessary Staff

The Department has the necessary staff positions to implement the Drinking Water SRF program. The Drinking Water SRF administrative, financial, and technical review staff for the Drinking Water SRF loan program are primarily located in the Water Protection Program's FAC. Staff administering the programs and activities funded by the set-aside portion of the Drinking Water SRF capitalization grants are primarily located in the Water Protection Program's PDWB. The Water Protection Program coordinates with the EIARA, a state environmental financing agency, to implement the direct loan program. Staff in the Department's Regional Offices provide assistance with Drinking Water SRF program and primacy-related field activities.

Grant Conditions Compliance

The Department continues to comply with all grant conditions. The following sections address specific compliance issues.

- **Lobbying:** Lobbying by grant recipients is restricted by Section 607(A) of P.L. 96-74 and by the Anti-Lobbying Act, Section 319 of P.L. 101-121. The Department has not engaged in illegal lobbying and has not used grant funds to support lobbying.
- **Debarment:** The Department has agreed to comply with EPA's policy on debarment and suspension under assistance, loan, and benefit programs. The Department has not solicited sub-agreements from debarred or suspended parties and has included notice of this policy in solicitations as required.
- **Disadvantaged Business Enterprises (DBE):** The Department has agreed to comply with

EPA's Program for Utilization of Small, Minority, and Women's Business Enterprises. It has agreed to negotiate fair share goals. The Department and all loan and grant recipients have included in their bid documents the fair share goals and followed the six affirmative steps stated in 40 CFR 31.36(e) and 40 CFR Part 33. The Department has submitted reports on disadvantaged business enterprise use as required based on the information provided from the loan recipients. DBE reports were submitted to EPA for the 2021 reporting period. The table below summarizes the DBE activity for Missouri's Drinking Water SRF program for the reporting period.

Assistance Activity 2021 Reporting Period		
	MBE	WBE
Construction	\$ -	\$ -
Equipment	-	-
Services	-	4,000
Supplies	439	11,770
Total	439	15,770
Percent	0.3%	10.8%
Goal	10%	5%

- Drinking Water SRF and Public Drinking Water Benefits Reporting System: The Department has agreed to submit an annual report on the state of the Drinking Water SRF program. This report fulfills the requirement of the annual report. The Department has updated the Public Drinking Water Benefits Reporting System as required for each loan recipient.
- Use of recycled paper: The Department has agreed to submit required reports to EPA on recycled paper. This report is printed on recycled paper.
- Indirect costs: The Department has agreed to charge indirect costs in the year that they are expended and in accordance with the negotiated indirect cost agreement. The Department has complied with the agreement and charged indirect costs in the years they were expended.
- Federal cross-cutters: The Department has agreed to comply with all federal cross-cutters identified in Appendix A of the Drinking Water SRF Program Guidelines. While loan recipients do not always receive assistance directly from the capitalization grant, the Department has ensured, by conditions in the loan agreements that cross-cutting authority applies to projects equating to at least the amount of the capitalization grants.

XV. Management's Discussion and Analysis

The following is a discussion and analysis of the financial activities for the Missouri Department of Natural Resources' Drinking Water State Revolving Fund (SRF) program for the year ended September 30, 2021. Readers are encouraged to consider the information presented here in conjunction with additional information that is furnished in the Notes to the Financial Statements.

Financial Highlights

The assets and deferred outflows of resources of the program exceeded liabilities and deferred inflows of resources at the close of the most recent reporting period by \$274,403,524 (net position). Net position, since inception of the program, consists of federal capitalization grant contributions of \$272,994,649, state match contributions of \$25,735,749, and a net loss of \$24,326,874. The net position of the program is all restricted. The program's enabling legislation and related regulations require that all money in the fund may be used only for purposes of the program.

Total assets decreased from \$344,556,944 at September 30, 2020, to \$339,264,962 at September 30, 2021. The assets of the enterprise funds decreased \$4,792,435 while the assets of the agency fund decreased \$499,547. Explanations for these changes are detailed in the Financial Analysis section.

Total liabilities decreased \$15,817,011. The majority of the decrease was from a decrease in bonds payable. Bonds payable decreased \$14,744,820 because the program has changed from primarily a leveraged loan program to a direct loan program and a refunding bond was issued during this reporting period.

During the reporting period, the program's total net position increased \$9,533,679. Capital contributions from the Environmental Protection Agency (EPA) totaled \$7,854,355. The current period's operating gain is \$1,688,242.

Overview of the Financial Statements

This discussion and analysis is intended to serve as an introduction to the Department's Drinking Water SRF basic financial statements. The program's basic financial statements are comprised of two components: 1) proprietary and fiduciary fund financial statements, and 2) notes to the financial statements.

The proprietary and fiduciary fund financial statements include a Statement of Net Position, a Statement of Revenues, Expenses and Changes in Net Position, a Statement of Cash Flows, and a Statement of Fiduciary Net Position.

- The Statement of Net Position presents the assets, deferred outflows of resources, liabilities, deferred inflows of resources, and net position of the program. Assets consist of cash and cash equivalents, investments, interest receivable from loans and investments, administration fees receivable, EPA set-aside grant funds receivable, and loans

receivable. Deferred outflows of resources consist of the deferred charge on refunding and deferred outflows for pension and other post-employment benefits (OPEB). Liabilities include accounts payable, unearned revenue(s), bonds payable, bond interest payable, net pension, and OPEB. Deferred inflows of resources include amounts deferred for pension and OPEB. Net position is the federal capitalization grant contributions, the state match contributions, and the excess earnings of the program's operations since inception.

- The Statement of Revenues, Expenses and Changes in Net Position presents information showing how the program's net position changed during the reporting period. All changes in net position are reported as soon as the underlying event giving rise to the change occurs, regardless of the timing of the related cash flows.
- The Statement of Cash Flows is provided to identify the sources and the uses of cash during the reporting period and to demonstrate that the program has sufficient cash to meet its obligations.
- The Statement of Fiduciary Net Position provides information about the program's agency fund. The agency fund consists of the assets and liabilities related to the loan funds that are held at trustee banks on behalf of the loan participants.

The notes to the financial statements provide additional information that is essential to a full understanding of the data provided in the fund financial statements.

Financial Analysis

Loan Fund:

The following section displays the current and prior year financial statements of the loan fund and describes some of the major reasons for the changes.

Loan Fund Net Position

	2021	2020	Percent Change
Current assets	\$ 128,779,504	\$ 104,997,988	23%
Non-current assets	205,195,363	233,640,627	-12%
Total assets	333,974,867	338,638,615	-1%
Deferred outflows	932,139	1,786,255	-48%
Total assets and deferred outflows	334,907,006	340,424,870	-2%
Current liabilities	13,849,597	15,787,002	-12%
Non-current liabilities	45,137,349	58,611,014	-23%
Total liabilities	58,986,946	74,398,016	-21%
Net position	\$ 275,920,060	\$ 266,026,854	4%

The total net position of the loan fund increased by four percent. Current assets increased by \$23,781,516 as cash on hand increased by \$26,877,273 and current restricted investments

increased by \$16,464, but current loans receivable decreased by \$2,858,950 along with loan and investment interest decreasing by \$253,271.

Non-current assets decreased by \$28,445,264 as a result of a \$8,469,000 decrease in non-current restricted investments, and a \$19,976,264 decrease in non-current loans receivable. Total liabilities decreased by \$15,411,070 as bonds payable decreased.

Changes in Loan Fund Net Position

	2021	2020	Percent Change
Operating revenues	\$ 4,073,028	\$ 4,789,077	-15%
Operating expenses	2,689,516	5,518,597	-51%
Operating income	1,383,512	(729,520)	290%
Non-operating revenues (expenses)	8,509,694	7,370,081	15%
Increase in net position	9,893,206	6,640,561	49%
Net position, beginning of year	266,026,854	259,386,293	3%
Net position, end of year	\$ 275,920,060	\$ 266,026,854	4%

Operating income increased by \$653,992 primarily as a result of the disbursements to grant recipients decreasing.

Loan Fund Cash Flows

	2021	2020	Percent Change
Cash flows from operating activities	\$ 24,014,269	\$ 21,474,320	12%
Cash flows from non-capital financing activities	(7,931,444)	(13,336,324)	-41%
Cash flows from investing activities	10,794,448	2,914,940	270%
Increase (decrease) in cash and cash equivalents	26,877,273	11,052,936	143%
Cash and cash equivalents, beginning of year	69,564,991	58,512,055	19%
Cash and cash equivalents, end of year	\$ 96,442,264	\$ 69,564,991	39%

The change in the loan fund cash flow numbers between fiscal year 2020 and 2021 was primarily for the following reasons:

- 1) A \$183,358 decrease in loan and grant disbursements, which also resulted in an increase to EPA grant funds received of \$176,724.
- 2) A \$16,117,148 increase in bond principal retired.
- 3) A \$7,879,508 increase in investments purchased due to there being no purchase in this reporting period, which did occur in the previous reporting period, and there was an increase in the proceeds from sales and investment maturities, due to the 2020B bond refunding.
- 4) A \$19,525,521 increase in the bonds issued.
- 5) A \$3,054,679 increase in the repayments received on loans.

Administration Fee Fund:

The following section displays the current and prior year financial statements of the administration fee fund and describes some of the major reasons for the changes.

Administration Fee Fund Net Position

	2021	2020	Percent Change
Current assets	\$ 4,349,392	\$ 4,186,040	4%
Non-current assets	785	1,108	-29%
Total assets	4,350,177	4,187,148	4%
Deferred outflows	(25,931)	(18,483)	40%
Total assets and deferred outflows	4,324,246	4,168,665	4%
Current liabilities	12,118	9,610	26%
Non-current liabilities	220,485	215,717	2%
Total liabilities	232,603	225,327	3%
Deferred inflows	(66,551)	(66,237)	0%
Total liabilities and deferred inflows	166,052	159,090	4%
Net position	\$ 4,158,194	\$ 4,009,575	4%

The 4 percent increase in the administration fee fund net position was primarily the result of a \$197,465 increase in cash and a corresponding decrease in Administrative Fees of \$33,119.

Changes in Administration Fee Fund Net Position

	2021	2020	Percent Change
Operating revenues	\$ 883,122	\$ 945,539	-7%
Operating expenses	72,760	245,417	-70%
Operating income	810,362	700,122	16%
Non-operating revenues (expenses)	(661,743)	38,188	-1833%
Increase in net position	148,619	738,310	-80%
Net position, beginning of year	4,009,575	3,271,265	23%
Prior period adjustment	-	-	0%
Net position, end of year	\$ 4,158,194	\$ 4,009,575	4%

There was a decrease of \$172,657 in operating expenses because less expenses were paid from administration fees in the previous reporting period. The decrease in non-operating revenues was due to a transfer for state match contribution.

Administration Fee Fund Cash Flows

	2021	2020	Percent Change
Cash flows from operating activities	\$ 858,215	\$ 883,921	-3%
Cash flows from noncapital financing activities	(675,003)	-	100%
Cash flows from investing activities	14,254	41,165	-65%
Decrease in cash and cash equivalents	197,466	925,086	-79%
Cash and cash equivalents, beginning of year	3,897,208	2,972,122	31%
Cash and cash equivalents, end of year	\$ 4,094,674	\$ 3,897,208	5%

Administration fee fund cash increased \$197,466 during the year mainly because the administration fees received exceeded the personal service and other administrative expenses by \$858,215.

Set-Aside Fund:

The following section displays the current and prior year financial statements of the set-aside fund and describes some of the major reasons for the changes:

Set-Aside Fund Net Position

	2021	2020	Percent Change
Current assets	\$ 509,822	\$ 799,528	-36%
Non-current assets	862	2,872	-70%
Total assets	510,684	802,400	-36%
Deferred outflows	899,392	1,029,529	-13%
Total assets and deferred outflows	1,410,076	1,831,929	-23%
Current liabilities	521,419	811,080	-36%
Non-current liabilities	6,461,407	6,085,416	6%
Total liabilities	6,982,826	6,896,496	1%
Deferred inflows	101,980	102,017	0%
Total liabilities and deferred inflows	7,084,806	6,998,513	1%
Net position	\$(5,674,730)	\$(5,166,584)	10%

The net position of the set-aside fund decreased \$508,146 in the 2021 reporting period, which was partially attributable to a \$86,330 increase in total liabilities and deferred inflows due to the net pension liability and OPEB liability, and a \$130,137 decrease in deferred outflows related to pension and OPEB. Current assets and liabilities also decreased proportionately, but non-current liabilities increased as well, more than offsetting that impact resulting in a net position change.

Changes in Set-Aside Fund Net Position

	2021	2020	Percent Change
Operating revenues	\$ 4,195,228	\$ 5,788,098	-28%
Operating expenses	4,700,860	6,418,069	-27%
Operating loss	(505,632)	(629,971)	-20%
Non-operating expenses	(2,514)	-	100%
Net position, beginning of year	(5,166,584)	(4,536,613)	14%
Net position, end of year	\$ (5,674,730)	\$ (5,166,584)	10%

There was a \$1,717,209 decrease in operating expenses. Salaries and benefits expense decreased \$925,513 and indirect costs decreased \$197,155. These decreases in operating expenses resulted in a corresponding decrease in EPA operating grant revenue.

Set-Aside Cash Flows:

Typically the set-aside fund does not have a cash balance, as any cash paid out is offset by cash coming in, resulting in the yearly cash provided by operating activities of \$0.

Agency Fund

The following section displays the current and prior year assets and liabilities of the agency fund:

Agency Fund Net Position	2021	2020	Percent Change
Assets	\$ 429,234	\$ 928,781	-54%
Liabilities	429,234	928,781	-54%
Net Position	\$ -	\$ -	0%

The agency fund assets and liabilities remained fairly static because the program continues to fund new loans on a payment-by-payment basis instead of placing one-hundred percent of the loan funds at a trustee bank at the time of the loan closing. The remaining agency funds consist of the applicant's unspent loan funds, debt service reserve funds, as well as the rebate funds held for arbitrage payments.

Note 1: Summary of Significant Accounting Policies

Reporting Entity

The Missouri Department of Natural Resources Drinking Water SRF program was established pursuant to the Safe Drinking Water Act (SDWA) Amendments of 1996. Section 1452 of this act authorizes the administrator of the EPA to establish a Drinking Water SRF program to assist public water systems with financing the costs of infrastructure needed to achieve or maintain compliance with the SDWA requirements, to protect public health, and to allow states to carry out prevention programs.

The Drinking Water SRF program was capitalized by the EPA through a series of grants starting in 1997. For most of the grants, states are required to provide an additional 20 percent of the federal capitalization grant as matching funds. As of September 30, 2021, Congress had authorized EPA to award \$436,116,331 in capitalization grants to the State of Missouri. The state is required to contribute \$79,650,866 in matching funds. This includes \$3,878,800 of state match that is due in the next reporting period.

The program is administered by the Department, the Missouri Environmental Improvement and Energy Resources Authority (EI ERA), and the Missouri Safe Drinking Water Commission. The EI ERA issues bonds or notes to finance qualified projects, and the Department receives the capitalization grants from the EPA. The program is comprised of four funds within the state and an agency fund that holds the construction loan funds. The state funds are:

- Water and Wastewater Loan Fund (Fund 0649) – receives the federal capitalization grant funds and uses those funds to make grants and loans;
- Water and Wastewater Loan Revolving Fund (Fund 0602) - receives loan repayments and uses those funds to make new loans;
- Water Pollution Permit Fee Fund (Fund 0568) - receives loan fees charged to borrowers and can be used to pay administration costs of the program; Fund 0568 includes a state match subaccount that funds federal capitalization grant state match; and
- Department of Natural Resources Federal Fund (Fund 0140) - receives federal capitalization grant funds that fund set-aside activities.

The agency fund accounts for the monies held at trustee banks on behalf of the loan participants, as well as the rebate funds held for arbitrage payments.

Missouri Department of Natural Resources
Drinking Water State Revolving Fund
Notes to the Financial Statements – Unaudited
Exhibit 6

Note 1: Summary of Significant Accounting Policies (continued)

Missouri's statewide Comprehensive Annual Financial Report includes the Drinking Water SRF program as a special revenue fund, which uses the modified accrual basis of accounting. Due to differences in reporting methods and periods, there may be differences between the amounts reported in these financial statements and the Comprehensive Annual Financial Report. One major difference between the amounts reported in these reports is that the agency fund is not included in the Comprehensive Annual Financial Report but is shown in these financial statements.

Program Operations

The program provides financing to participants using three main types of funding: leveraged and reserve loans, direct loans, and grants.

A. Leveraged and Reserve Loans

Prior to State Fiscal Year (SFY) 2010, the program's main type of financing was through the use of leveraged and reserve loans. Missouri leveraged federal and state matching funds by issuing revenue bonds to make loans to qualified communities and by using federal grant and state matching funds to create reserves for the loans. Interest earned on the reserves subsidized loan interest rates and enhanced the security of the loans, which are pledged to repay bond principal and interest. Borrowers, in essence, received two loans from the Drinking Water SRF program: a market-rate loan funded by the revenue bond proceeds that equaled project construction costs, and a zero-rate loan funded by capitalization grants and state matching funds that funded the reserves for the bonds. Bond proceeds were deposited to the construction loan accounts, which were held by the trustee bank. As communities drew on these funds to pay construction costs, a percentage of that amount (33.33 percent for bonds issued prior to 2002, 50 percent for bonds issued from 2002-2003, and 70 percent for bonds issued after 2003) was transferred to a reserve account established for each borrower. For loans closed in SFY 2009, the reserve accounts were funded at closing rather than as construction funds were released. Earnings in the reserve account reduced the borrower's net interest payments on the bonds, resulting in the subsidized, blended interest rate on the project loan.

Beginning with bond series 2003C, a portion of the revenue bonds sold to fund the leveraged loans were state match bonds that will be repaid with interest earnings on the loans. The state match bond proceeds were used to fund a portion of the construction loan account, while the reserve account was funded with federal grant and recycled funds.

Missouri Department of Natural Resources
Drinking Water State Revolving Fund
Notes to the Financial Statements – Unaudited
Exhibit 6

Note 1: Summary of Significant Accounting Policies (continued)

B. Direct Loans

Direct loans that were closed on prior to SFY 2010 were funded from the Water and Wastewater Loan Revolving Fund. Loan proceeds were deposited to the construction loan accounts, which were held by the trustee bank. As construction costs were incurred, funds were released from the trustee bank to the borrower. The borrower repaid the loan by making monthly principal and interest payments to the trustee bank. On the debt service due dates, the trustee bank makes the debt service payment to the program.

During SFY 2010, the program changed how it funds direct loans. Instead of funding the loan up front and holding the funds at a trustee bank, the loan is funded incrementally as construction costs are incurred and funds are requested by the loan recipient. The borrower repays the loan by making quarterly principal and interest payments to the trustee bank. These loans are funded with federal grant and/or recycled funds.

C. Grants

Missouri was awarded the American Recovery and Reinvestment Act (ARRA) capitalization grant during SFY 2010. The terms and conditions of the ARRA capitalization grant required that not less than 50 percent of assistance provided be in the form of additional loan subsidies, such as principal forgiveness, negative interest loans or grants. Missouri chose to provide the required additional subsidization through grants. ARRA projects were funded through a combination of 50 percent grant and 50 percent loan with a maximum grant of \$2,000,000 per applicant. Disadvantaged communities were eligible for a 75 percent grant with a 25 percent direct loan. Grant payments were made directly to the recipient as construction costs were incurred.

Terms and conditions of the following capitalization grants require that additional subsidization in the form of principal forgiveness, negative interest rate loans, or grants be provided. Missouri has chosen to provide the additional subsidization through grants. However, after passage of the America's Water Infrastructure Act (AWIA) in 2018, the Department is required to make additional subsidies available through principal forgiveness rather than grant with a specified percentage of its capitalization grant, beginning with the 2019 capitalization grant. The following table lists the ranges at which additional subsidization is required.

**Missouri Department of Natural Resources
Drinking Water State Revolving Fund
Notes to the Financial Statements – Unaudited
Exhibit 6**

Note 1: Summary of Significant Accounting Policies (continued)

Federal Fiscal Year	Drinking Water Capitalization Grant	State Fiscal Year Awarded	Minimum	Maximum
2010	FS997629-10	2011		30.00 percent
2011	FS997629-11	2012		30.00 percent
2012	FS997629-12	2013	20.00 percent	30.00 percent
2013	FS997629-13	2014	20.00 percent	30.00 percent
2014	FS997629-14	2014	20.00 percent	30.00 percent
2015	FS997629-15	2015	20.00 percent	30.00 percent
2016	FS997629-16	2016	20.00 percent	20.00 percent
2017	FS997629-17	2017	20.00 percent	20.00 percent
2018	FS997629-18	2018	20.00 percent	20.00 percent
2019	FS997629-19	2019	20.00 percent	20.00 percent
2019-AWIA	FS997629-19	2019	6.00 percent	35.00 percent
2020	FS997629-20	2020	14.00 percent	14.00 percent
2020-AWIA	FS997629-20	2020	6.00 percent	35.00 percent
2021	FS997629-21	2021	14.00 percent	14.00 percent
2021-AWIA	FS997629-21	2021	6.00 percent	35.00 percent

* America's Water Infrastructure Act (AWIA) of 2018 went into effect with the 2019 Capitalization grant and requires the state to make loan subsidies to disadvantaged communities, in addition to the additional subsidy that is required by Congress as stated in the Congressional Appropriations.

Basis of Accounting

The financial statements include enterprise funds and a fiduciary fund. The loan, administration fee and set-aside funds are presented as enterprise funds and the agency fund is presented as a fiduciary fund. All funds are maintained on the accrual basis. The enterprise funds are accounted for using the flow of economic resources measurement focus. Under the accrual basis of accounting, revenues are recognized when earned and expenses are recorded at the time the liabilities are incurred.

All assets, deferred inflows and outflows of resources and liabilities associated with the operations of the enterprise funds are included on the Statement of Net Position. The assets and liabilities of the agency fund are included on the Statement of Fiduciary Net Position.

Drinking Water SRF reports the following major funds:

Loan Fund. The loan fund provides financial assistance to municipalities, counties, political subdivisions and instrumentalities of the state. Funding for these loan programs is generated from federal capitalization grants, proceeds of revenue bonds issued to provide required state matching monies, proceeds of revenue bonds issued for the leveraged program, and recycled monies.

**Missouri Department of Natural Resources
Drinking Water State Revolving Fund
Notes to the Financial Statements – Unaudited
Exhibit 6**

Note 1: Summary of Significant Accounting Policies (continued)

Administration Fee Fund. This fund accounts for the administration fees received on loans and the use of those fees to pay salaries, associated expenses of program personnel devoting time to the administration of the program and other eligible purposes.

Set-Aside Fund. The set-aside fund provides monies to establish and implement programs with emphasis on preventing contamination problems through source-water protection and encouraging better system operations. The Drinking Water SRF program allows states to reserve up to 31 percent of the capitalization grant to use towards administration and technical assistance, small system technical assistance, public water system supervision program management and local assistance and other state programs. In 2021, the Department reserved 31 percent of the federal fiscal year (FFY) 2021 grant for set-aside activities.

In addition, the program reports the following fund type:

Agency Fund. This fund accounts for monies held on behalf of municipalities, counties, political subdivisions, and instrumentalities of the state. This fund includes the funds generated by the sale of the bonds on behalf of loan participants, which are deposited with a trustee bank in the applicant's name. The agency fund also includes rebate funds held for arbitrage payments.

Cash, Cash Equivalents and Investments

A. Enterprise Funds

All monies in the state funds (Funds 0140, 0568, 0602, and 0649) are required to be deposited with the Missouri State Treasurer's Office, which is responsible for maintaining the deposits in accordance with state law. The program considers all such deposits to be cash. Investment interest earnings on these deposits are received by the program periodically throughout the month.

According to state law, the Treasurer is responsible for maintaining the cash balances and investing excess cash of the program, as further discussed in Note 2. Consequently, management of the program does not have any control over the investment of the excess cash. The statement of cash flows considers all funds deposited with the Treasurer to be cash or cash equivalents, regardless of actual maturities of the underlying investments.

**Missouri Department of Natural Resources
Drinking Water State Revolving Fund
Notes to the Financial Statements – Unaudited
Exhibit 6**

Note 1: Summary of Significant Accounting Policies (continued)

Monies of the enterprise funds that are held at the trustee bank are invested in either money market mutual funds, guaranteed investment contracts, or state and local government series securities by the trustee bank. The money market mutual funds are considered to be cash or cash equivalents. The securities are longer term investments and are stated at fair value. The contracts are stated at cost as they are not negotiable or transferable and are not affected by market fluctuations. The enterprise funds do not include monies held at trustee banks on behalf of the loan participants. Those monies are accounted for under the agency fund.

B. Agency Fund

The agency fund accounts for the monies held at trustee banks on behalf of the loan participants, as well as the rebate funds held for arbitrage payments. The program considers all highly liquid investments with original maturities of three months or less to be cash equivalents.

Operating Revenues and Expenses

Revenues and expenses as a result of providing loans and grants to participants are considered operating revenues and expenses. Operating revenues include interest earned on loans, administration fee revenue, and operating grants. Operating expenses include grant payments, salaries, benefits, other administrative expenses, and accruals.

The non-operating revenues and expenses of the program are investment income, EPA capitalization grant revenues and bond related expenses.

Administration Fees

The program charges an administration fee to borrowers to fund administrative costs of operating the program. The program's administrative expenses are currently paid with administration fees and grant set-aside funds. During the reporting period ending September 30, 2021, \$916,242 was collected for administration fees from borrowers and \$14,254 of investment interest was received. The cash balance of the administration fee fund was \$4,094,674 as of September 30, 2021.

Missouri Department of Natural Resources
Drinking Water State Revolving Fund
Notes to the Financial Statements – Unaudited
Exhibit 6

Note 1: Summary of Significant Accounting Policies (continued)

Pensions

For purposes of measuring the net pension liability, deferred outflows of resources and deferred inflows of resources related to pensions, and pension expense, information about the fiduciary net position of the Missouri State Employees' Retirement System (MOSERS) and additions to and deductions from MOSERS' fiduciary net position have been determined on the same basis as they are reported by MOSERS. For this purpose, benefit payments (including refunds of employee contributions) are recognized when due and payable in accordance with the benefit terms. Investments are reported at fair value.

Bonds Payable

Bonds issued prior to 2010 are special limited obligations of EIARA, payable from borrower loan repayments and a reserve account established for each borrower in accordance with a master trust agreement. Interest expense is reported on the accrual basis. Due to the flow-through effect of the bonds and related receivables, bond discounts, premiums and issuance costs are not reported by the program since they represent the costs of the borrowers.

Borrowers make monthly payments to debt service repayment accounts, which also earn interest that further subsidizes the interest rates. On bond payment dates, transfers are made from the repayment accounts to the debt service funds to make the semi-annual interest payments and annual bond principal payments. Interest earnings on the construction loan accounts and reserve accounts are also transferred to the debt service funds on the bond payment dates. These interest earnings reduce the amount that is needed from the repayment accounts.

As outstanding bond principal is reduced, a proportional amount is released from the reserve account. The released amounts flow to the master trust unallocated fund, and, if there are no defaults, are transferred to the Water and Wastewater Loan Revolving Fund to be used to make new loans.

Bonds issued since 2010 are different than previous issues. There is no longer a direct link between the bonds and the loans. Any premium or cost of issuing the bonds is no longer passed on to the loan borrower. Therefore, those amounts are reported on the program's financial statements.

Exhibit 6

Note 1: Summary of Significant Accounting Policies (continued)

Deferred Outflows and Inflows of Resources

In addition to assets, the statement of net position will sometimes report a separate section for deferred outflows of resources. This separate financial statement element, *deferred outflows of resources*, represents a consumption of net position that applies to a future period and so will not be recognized as an outflow of resources (expense/expenditure) until then. The program has three items that qualify for reporting in this category. Those are the deferred charge on refunding, the deferred outflows for pension, and the deferred outflows for Other Post-Employment Benefits (OPEB), which are reported in the statement of net position. The deferred charge on refunding results from the difference in the carrying value of refunded debt and its reacquisition price. This amount is deferred and amortized over the shorter life of the refunded or refunding debt.

In addition to liabilities, the statement of financial position will sometimes report a separate section for deferred inflows of resources. This separate financial statement element, *deferred inflows of resources*, represents an acquisition of net position that applies to a future period and so will not be recognized as an inflow of resources (revenue) until that time. The program has two items that qualify for reporting in this category, which are deferred inflows for pension and deferred inflows for OPEB.

Pending Governmental Accounting Standards Board Statements

GASB Statement No. 91

GASB Statement No. 91, *Conduit Debt Obligations*, was issued May 2019. The primary objectives of this Statement are to provide a single method of reporting conduit debt obligations by issuers and eliminate diversity in practice associated with (1) commitments extended by issuers, (2) arrangements associated with conduit debt obligations, and (3) related note disclosures. This Statement achieves those objectives by clarifying the existing definition of a conduit debt obligation; establishing that a conduit debt obligation is not a liability of the issuer; establishing standards for accounting and financial reporting of additional commitments and voluntary commitments extended by issuers and arrangements associated with conduit debt obligations; and improving required note disclosures. This Statement also addresses arrangements—often characterized as leases—that are associated with conduit debt obligations. In those arrangements, capital assets are constructed or acquired with the proceeds of a conduit debt obligation and used by third-party obligors in the course of their activities. Payments from third-party obligors are intended to cover and coincide with debt service payments. During those arrangements, issuers retain the titles to the capital assets. Those titles may or may not pass to the obligors at the end of the arrangements. This Statement requires issuers to disclose general information about their conduit debt obligations, organized by type of commitment, including the aggregate outstanding principal amount of the issuers' conduit debt obligations and a description of each type of commitment. Issuers that recognize liabilities related to supporting the debt

Exhibit 6

Note 1: Summary of Significant Accounting Policies (continued)

service of conduit debt obligations also should disclose information about the amount recognized and how the liabilities changed during the reporting period. The requirements of this Statement are effective for reporting periods beginning after December 15, 2021. GASB Statement No. 95 postpones by one year the effective dates of certain provisions of this statement.

GASB Statement No. 92

GASB Statement No. 92, *Omnibus 2020*, was issued January 2020. The objectives of this Statement are to enhance comparability in accounting and financial reporting and to improve the consistency of authoritative literature by addressing practice issues that have been identified during implementation and application of certain GASB Statements. The requirements of this Statement are effective for reporting periods beginning after June 15, 2020. GASB Statement No. 95 postpones by one year the effective dates of certain provisions of this statement.

GASB Statement No. 93

GASB Statement No. 93, *Replacement of Interbank Offered Rates*, was issued March 2020. Some governments have entered into agreements in which variable payments made or received depend on an interbank offered rate (IBOR)—most notably, the London Interbank Offered Rate (LIBOR). As a result of global reference rate reform, LIBOR is expected to cease to exist in its current form at the end of 2021, prompting governments to amend or replace financial instruments for the purpose of replacing LIBOR with other reference rates, by either changing the reference rate or adding or changing fallback provisions related to the reference rate. The requirements of this Statement are effective for reporting periods beginning after June 15, 2020 and December 31, 2021. GASB Statement No. 95 postpones by one year the effective dates of certain provisions of this statement.

GASB Statement No. 94

GASB Statement No. 94, *Public-Private and Public-Public Partnerships and Availability Payment Arrangements*, was issued March 2020. The primary objective of this Statement is to improve financial reporting by addressing issues related to public-private and public-public partnership arrangements (PPPs). As used in this Statement, a PPP is an arrangement in which a government (the transferor) contracts with an operator (a governmental or nongovernmental entity) to provide public services by conveying control of the right to operate or use a nonfinancial asset, such as infrastructure or other capital asset (the underlying PPP asset), for a period of time in an exchange or exchange-like transaction. Some PPPs meet the definition of a service concession arrangement (SCA), which the Board defines in this Statement as a PPP in which (1) the operator collects and is compensated by fees from third parties; (2) the transferor determines or has the ability to modify or approve which services the operator is required to provide, to whom the operator is required to provide the services, and the prices or rates that can be charged for the

Missouri Department of Natural Resources
Drinking Water State Revolving Fund
Notes to the Financial Statements – Unaudited
Exhibit 6

Note 1: Summary of Significant Accounting Policies (continued)

services; and (3) the transferor is entitled to significant residual interest in the service utility of the underlying PPP asset at the end of the arrangement. The requirements of this Statement are effective for reporting periods beginning after June 15, 2022, and all other reporting periods thereafter.

GASB Statement No. 95

GASB Statement No. 95, *Postponement of the Effective Dates of Certain Authoritative Guidance*. The primary objective of this Statement is to provide temporary relief to governments and other stakeholders in light of the COVID-19 pandemic. That objective is accomplished by postponing the effective dates of certain provisions in Statements and Implementation Guides that first became effective or are scheduled to become effective for periods beginning after June 15, 2018, and later.

GASB Statement No. 96

GASB Statement No. 96, *Subscription-Based Information Technology Arrangements*, was issued May 2020. This Statement provides guidance on the accounting and financial reporting for subscription-based information technology arrangements (SBITAs) for government end users (governments). This Statement (1) defines a SBITA; (2) establishes that a SBITA results in a right-to-use subscription asset—an intangible asset—and a corresponding subscription liability; (3) provides the capitalization criteria for outlays other than subscription payments, including implementation costs of a SBITA; and (4) requires note disclosures regarding a SBITA. To the extent relevant, the standards for SBITAs are based on the standards established in Statement No. 87, *Leases*, as amended. The requirements of this Statement are effective for reporting periods beginning after June 15, 2022, and all other reporting periods thereafter.

GASB Statement No. 97

GASB Statement No. 97, *Certain Component Unit Criteria, and Accounting and Financial Reporting for Internal Revenue Code Section 457 Deferred Compensation Plans – an amendment of GASB Statements No. 15 and No. 84, and a supersession of GASB Statement No. 32*, was issued June 2020. The primary objectives of this Statement are to (1) increase consistency and comparability related to the reporting of fiduciary component units in circumstances in which a potential component unit does not have a governing board and the primary government performs the duties that a governing board typically would perform; (2) mitigate costs associated with the reporting of certain defined contribution pension plans, defined contribution other postemployment benefit (OPEB) plans, and employee benefit plans other than pension plans or OPEB plans (other employee benefit plans) as fiduciary component units in fiduciary fund financial statements; and (3) enhance the relevance, consistency, and comparability of the accounting and financial reporting for Internal Revenue Code (IRC) Section 457 deferred compensation plans (Section 457 plans) that meet the definition of a pension plan and for benefits provided through those plans.

**Missouri Department of Natural Resources
Drinking Water State Revolving Fund
Notes to the Financial Statements – Unaudited
Exhibit 6**

Note 1: Summary of Significant Accounting Policies (continued)

Certain requirements of this Statement are effective immediately while others are effective for reporting periods beginning after June 15, 2021.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Note 2: Cash, Cash Equivalents, and Investments

State Funds

All cash in the state funds (Funds 0140, 0568, 0602, and 0649) is required to be deposited with the State Treasurer, who is responsible for maintaining and investing the pooled cash balances in accordance with state laws. The Treasurer is required to maintain a mix of investments in order to allow funds to be withdrawn at any time to meet normal operating needs. The program's share of the investment income from the local government investment pool is based on the average daily balance for the period and is credited to the program periodically throughout the month.

The State Treasurer's Office (STO) has its own policies for custodial credit risk, interest rate risk, credit risk, concentration of credit risk and foreign currency risk. Details of the investments and risks can be obtained from the STO.

All cash and investments in the local investment pool are stated at cost, which approximates fair value. The investments in the local government investment pool are not exposed to custodial credit risk because their existence is not evidenced by securities that exist in physical or book entry form.

Trustee Bank Funds

All cash and investments held by trustee banks are invested in accordance with the trustee investment agreement and the bond indentures. Allowable investments include:

- Federal securities.
- Direct and general obligations of the state which are pledged by the full faith and credit of the state and are rated in either of the two highest rating categories.
- Deposits at banks, trust companies or savings and loan associations which are fully insured by FDIC.

**Missouri Department of Natural Resources
Drinking Water State Revolving Fund
Notes to the Financial Statements – Unaudited
Exhibit 6**

Note 2: Cash, Cash Equivalents, and Investments (continued)

- Federal funds, unsecured certificates of deposit, time deposits and banker acceptances (having maturities of not more than 365 days) of any bank and which are rated in the highest short term rating category.
- Unsecured promissory notes of any bank, trust company, national banking association or bank holding company equal to such institution's outstanding unsecured long term debt that is rated in the highest rating category.
- Tax exempt permitted investments.
- Any other investment agreement with a provider that is rated, or whose unsecured, long term obligations are rated at least "Aa2" or equivalent, or with a provider whose obligations are guaranteed by a guarantor which is rated, or whose unsecured, long term obligations are rated at least "Aa2" or equivalent.
- Commercial paper issued by domestic corporations rated in the second highest short term rating category.
- Shares in money market mutual funds rated in the highest applicable rating category.

Custodial credit risk. This is the risk that, in the event of the failure of the counterparty, the program will not be able to recover the value of its deposits or investments. There are no cash and cash equivalents held by the trustee banks that were exposed to custodial credit risk. Also, no cash and cash equivalents were invested in money market mutual funds.

Interest rate risk. Interest rate risk is the risk that changes in interest rates may adversely affect the investment's fair value. The program does not have a policy to address interest rate risk.

Credit risk. The trustee banks are responsible for monitoring credit risk as it relates to the types of investments that can be made in accordance with the trustee investment agreement. The program has no investment policy that further limits its investment choices.

Concentration of credit risk. The program places no limit on the amount that may be invested with any one issuer.

Fair value measurement. The Drinking Water SRF program categorizes its fair value measurements within the fair value hierarchy established by generally accepted accounting principles. The hierarchy is based on the valuation inputs used to measure the fair value of the asset. Level 1 inputs are quoted prices in active markets for identical assets; Level 2 inputs are significant other observable inputs; Level 3 inputs are significant unobservable inputs.

As of September 30, 2021, the Drinking Water SRF program's government agency and state and local government fixed income securities of \$41,911,072 were valued using pricing of similar assets in markets that were not active (Level 2 input).

**Missouri Department of Natural Resources
Drinking Water State Revolving Fund
Notes to the Financial Statements – Unaudited
Exhibit 6**

Note 2: Cash, Cash Equivalents, and Investments (continued)

As of September 30, 2021, the loan fund had the following investments:

Investment Type	Fair Value	Investment Maturities		
		<1 Year	1-5 Years	>5 Years
Gov't Agency & State and Local	\$41,911,072	\$8,469,000	\$28,986,000	\$4,456,072

Note 3: Loans Receivable

Loans receivable consist of three types: leveraged loans, reserve loans, and direct loans. Leveraged loans are funded by the sale of revenue bonds, the proceeds of which are deposited to a construction loan fund. Borrowers are loaned funds from the construction loan fund to pay for construction costs incurred. The terms of the loans mirror the terms of the bonds in order to provide the funds to pay bond interest and principal according to the terms of the bonds. In conjunction with the leveraged loan that funds construction, a reserve loan is made to provide an interest subsidy to the borrower and to provide security for bond principal and interest.

With direct loans, there is no bond sale directly related to the loan. The loans are funded directly from the federal capitalization grant or recycled monies.

The following details the three types of loans as of September 30, 2021:

Loan Type	Loan Amount Authorized	Outstanding Balance
Leveraged	\$250,735,000	\$ 38,460,000
Direct	202,844,700	129,923,564
Reserve	133,403,148	26,347,596
Total	<u>\$586,982,848</u>	194,731,160
Less Current Maturities		22,879,515
Loans Receivable, Net of Current Portion		<u>\$171,851,645</u>

Loans receivable activity during the year ended September 30, 2021, is summarized as follows:

Type of Loan	Sept. 30, 2020		Repayments	Sept. 30, 2021 Balance
	Balance	Disbursements		
Leveraged Loans	\$ 53,065,000	\$ -	\$(14,605,000)	\$ 38,460,000
Direct Loans	130,333,276	8,567,088	(8,976,800)	129,923,564
Reserve Loans	34,168,098	-	(7,820,502)	26,347,596
	<u>\$217,566,374</u>	<u>\$ 8,567,088</u>	<u>\$(31,402,302)</u>	<u>\$194,731,160</u>

**Missouri Department of Natural Resources

Exhibit 6**

Note 3: Loans Receivable (continued)

Loan Maturities

The scheduled principal payments in subsequent years are as follows:

Year Ending Sept. 30	Leveraged	Direct	Reserve	Total
2022	\$8,645,000	\$8,742,019	\$5,492,496	\$22,879,515
2023	7,320,000	8,967,000	5,053,983	21,340,983
2024	7,990,000	9,129,800	5,497,075	22,616,875
2025	6,755,000	9,296,900	4,864,651	20,916,551
2026	4,650,000	9,462,800	3,269,391	17,382,191
2027-2031	3,100,000	46,752,279	2,170,000	52,022,279
2032-2036	-	33,274,692	-	33,274,692
2037-2041	-	4,298,074	-	4,298,074
Total	\$38,460,000	\$129,923,564	\$26,347,596	\$194,731,160

Loans to Major Local Recipients

As of September 30, 2021, the program had made loans to eight agencies that account for approximately 50 percent of the total loans receivable. The outstanding balances of the loans for these agencies are as follows:

Borrower	Original Amount	Outstanding Principal Balance	Outstanding Reserve Balance
Cape Girardeau	\$ 27,495,000	\$ -	\$ -
Clarence Cannon WWC	23,980,000	6,966,900	2,163,891
Hannibal	12,960,000	9,771,500	-
Jefferson County Water Authority	20,167,000	432,300	-
Marshfield	12,474,000	5,084,972	-
Monett	13,012,000	7,290,900	-
Osage Beach	33,210,000	4,695,000	2,542,266
Tri-County Water Authority	77,427,000	41,938,000	9,942,458
Total	\$220,725,000	\$ 76,179,572	\$14,648,615

Exhibit 6

Note 4: Bonds Payable

The Missouri Drinking Water SRF program issues revenue bonds as well as using federal capitalization grants and state matching funds to finance qualified projects. Bonds payable and loans receivable are recorded in the loan fund. Cash and project costs payable are recorded in the agency fund. For bond series 2008A, the reserves were fully funded on the day of bond closing, rather than being funded incrementally as construction funds are released. Interest earned on the construction loan fund and the reserve fund subsidizes the interest on the borrower's loan. As borrowers repay the loans, the interest and principal serve as the source of funds to pay bond principal and interest.

Beginning with bond series 2004C, state match bonds were issued by the EIARA in addition to leveraged bonds. Proceeds from both the state match bonds and the leveraged bonds are deposited into the borrowers' accounts at the trustee bank. The reserves for the leveraged bonds are then funded by federal capitalization grants or recycled funds.

In SFY 2011, revenue bond series 2010B was issued. In addition, the EIARA issued state match revenue bond series 2015A in SFY 2015 and state match revenue bond series 2018A in SFY 2018. Proceeds of this bond sale went to the recycled fund to provide additional funding for new loans. Proceeds from these bond sales were also deposited into the recycled fund to provide funding for new loans. These bond sales are different from previous bonds in that they were to provide additional funding that can be used to fund any loan being funded with recycled monies. The principal and interest repayments on the program's direct loans have been pledged to make the principal and interest repayments on the bonds.

In SFY 2021, EIARA issued Taxable Water Pollution Control and Drinking Water Refunding Revenue Bonds Series 2020B, and applied portions of the proceeds to refund certain outstanding bonds of the EIARA, including all of the outstanding prior bonds.

In addition to revenue bonds, there have been three state match general obligation bond issues. The state issued series A2002 to provide state match funding. In July 2010, the state issued series A2010, which partially refunded series A2002. In September 2012, the state issued series A2012 which refunded the rest of series A2002.

As of September 30, 2021, 7 separate revenue bond series remain outstanding, which have a total outstanding balance of \$55,335,000. The individual series, outstanding balances, and principal due included:

Note 4: Bonds Payable (continued)

Advance Refundings

Seven separate refunding bond series (Series 2004A, 2010A, 2011A, 2013A, 2015B, 2020A, and 2020B) totaling \$105,895,000 have been issued to provide resources to purchase U.S. Government State and Local Government Series securities that were placed in irrevocable trusts for the purpose of generating resources for future debt service payments of \$145,232,450 of revenue bonds. As a result, the refunded bonds are considered to be defeased and the liability has been removed from the Statement of Net Position. As of September 30, 2021, the amount of refunded bonds that had yet to be called totaled \$4,435,000.

Note 5: Arbitrage Rebate

In accordance with Internal Revenue Code Section 148(f) relating to arbitrage restrictions on tax-exempt bonds, an arbitrage rebate payable of \$254,467 has been recorded. This liability is cumulative for the Series 2018A bonds. The portion of this pending rebate of excess investment earnings that is attributable to this series is due no later than 60 days after each installment computation date. The next annual rebate computation date will be July 1, 2022.

Note 6: Pension Plan

Plan Description

Benefit eligible employees of the Department are provided with pensions through Missouri State Employees' Plan (MSEP) - a cost-sharing multiple-employer defined benefit pension plan administered by MOSERS. The plans are referred to as MOSERS in the notes. Chapter 104.320 of the Revised Statutes of Missouri grants the authority to establish a defined benefit plan for eligible state and other related agency employees. MOSERS issues an annual Comprehensive Annual Financial Report (CAFR), a publicly available financial report that can be obtained at www.mosers.org.

Benefits Provided

MOSERS provides retirement, survivor, and disability benefits to eligible employees. The base retirement benefits are calculated by multiplying the employee's final average pay by a specific factor multiplied by the years of credited service. The factor is based on the specific plan in which the employee participates, which is based on the employee's hire date. Information on the two plans administered by MOSERS (MSEP and MSEP 2000 (MSEP 2011 is a tier of the MSEP 2000 plan)) and how eligibility and the benefit amount is determined for each plan may be found in the Notes to the Financial Statements of MOSERS' CAFR at www.mosers.org.

**Missouri Department of Natural Resources
Drinking Water State Revolving Fund
Notes to the Financial Statements – Unaudited
Exhibit 6**

Note 6: Pension Plan (continued)

Contributions

Per Chapter 104.436 of the Revised Statutes of Missouri, contribution requirements of the active employees and the participating employers are established and may be amended by the MOSERS Board. Employees in the MSEP 2011 Plan are required to contribute 4.0 percent of their annual pay. The Drinking Water SRF program's required contribution rate for the year ended June 30, 2021, was 22.77 percent of annual payroll, actuarially determined as an amount that, when combined with employee contributions, is expected to finance the costs of benefits earned by employees during the year, with an additional amount to finance any unfunded accrued liability.

Contributions to the pension plan from the Drinking Water SRF program were \$499,229 for the fiscal year ended September 30, 2021.

Net Pension Liability

At September 30, 2021, a liability was reported of \$6,539,179 for the Drinking Water SRF program's proportionate share of the net pension liability. The net pension liability was measured as of June 30, 2020, and the total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of that date. The total pension liability was offset by the fiduciary net position obtained from MOSERS CAFR as of June 30, 2020, to determine the net pension liability.

The Drinking Water SRF program's proportion of the net pension liability was based on the Department's actual share of contributions to the pension plan relative to the actual contributions of all participating employers for MOSERS plan year ended June 30, 2020. At the June 30, 2020, measurement date, the Drinking Water SRF program's proportion was 0.1030 percent, a decrease from its proportion measured using 0.1019 percent as of June 30, 2019, measurement date.

There were no changes in benefit terms during the MOSERS plan year ended June 30, 2020, that affected the measurement of total pension liability.

Drinking Water State Revolving Fund
Notes to the Financial Statements – Unaudited
Exhibit 6**

Note 6: Pension Plan (continued)

Actuarial Assumptions

The total pension liability in the June 30, 2020, actuarial valuation, which is also the date of measurement for GASB 68 purposes, was determined using the following actuarial assumptions, applied to all periods included in the measurement:

Inflation	2.25%
Salary Increases	2.75% to 8.25% including inflation
Wage Inflation	2.25%
Investment Rate of Return	6.95%, compounded annually, net after investment expenses and including inflation

The actuarial assumptions used in the June 30, 2020, valuation were based on the results of an actuarial experience study for the period July 1, 2010, to June 30, 2015. In addition, the investment return assumption was reduced from 7.10 percent to 6.95 percent for the June 30, 2020 valuation. Other assumption changes were decreases in the payroll and wage growth assumptions.

Mortality

Mortality rates for post-retirement mortality are based on the RP-2014 Healthy Annuitant mortality table, projected to 2026 with Scale MP-2015 and scaled by 120 percent. The pre-retirement mortality table used is the RP-2014 Employee mortality table, projected to 2026 with Scale MP-2015 and scaled by 95 percent for males and 90 percent for females.

Long-Term Investment Rate of Return

The long-term expected rate of return on pension plan investments was determined using a building-block method in which best-estimates rates of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adjusting for expected inflation, volatility, and correlation. Best estimates of the real rates of return expected for each major asset class included in MOSERS target asset allocation as of June 30, 2020, are summarized in the following table:

**Missouri Department of Natural Resources
Drinking Water State Revolving Fund
Notes to the Financial Statements – Unaudited
Exhibit 6**

Note 6: Pension Plan (continued)

Asset Class	Policy Allocation	Long-term Expected Nominal Return*	Weighted Average Long-term Expected Nominal Return
Global public equities	30.0%	7.7%	2.3%
Global private equities	15.0%	9.3%	1.4%
Long treasuries	25.0%	3.5%	0.9%
Core bonds	10.0%	3.1%	0.3%
Commodities	5.0%	5.5%	0.3%
TIPS	25.0%	2.7%	0.7%
Private real assets	5.0%	7.1%	0.3%
Public real assets	5.0%	7.7%	0.4%
Hedge funds	5.0%	4.8%	0.2%
Alternative beta	10.0%	5.3%	0.5%
Private credit	5.0%	9.5%	0.5%
Cash and cash equivalents**	(40.0)%	-	-
Total	100.0%		7.8%

*Long-term expected arithmetic returns of the asset classes at the time of the asset allocation study for each portfolio.

**Cash and cash equivalents policy allocation amounts are negative due to use of leverage.

Discount Rate

The discount rate used to measure the total pension liability was 6.95 percent. The projection of cash flows used to determine the discount rate assumed that contributions from employers will be made using the actuarially determined rates. Based on those assumptions, the pension plan's fiduciary net position was projected to be available to make all projected future benefit payments of current active and inactive employees. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability.

Sensitivity of the Drinking Water SRF Program's Proportionate Share of the Net Pension Liability to Changes in the Discount Rate

The following presents the Drinking Water SRF program's proportionate share of the net pension liability calculated using the discount rate of 6.95 percent, as well as what the Drinking Water SRF program's proportionate share of the net pension liability would be if it were calculated using a discount rate that is 1 percentage point lower (5.95 percent) or 1 percentage point higher (7.95 percent) than the current rate:

**Missouri Department of Natural Resources
Drinking Water State Revolving Fund
Notes to the Financial Statements – Unaudited
Exhibit 6**

Note 6: Pension Plan (continued)

	1% Decrease (5.95%)	Current Discount Rate (6.95%)	1% Increase (7.95%)
Drinking Water SRF program's proportionate share of the net pension liability	\$8,187,987	\$6,539,179	\$5,152,401

Pension Plan Fiduciary Net Position

Detailed information about the pension plan's fiduciary net position is available in the separately issued MOSERS comprehensive annual financial report, which may be requested from Missouri State Employees' Retirement System, P.O. Box 209, Jefferson City, MO 65102-0209 or viewed on www.mosers.org.

Pension Expense

For the year ended September 30, 2021, the Drinking Water SRF program recognized pension expense of \$1,106,994.

Deferred Outflows of Resources and Deferred Inflows of Resources

At September 30, 2021, the Drinking Water SRF program reported deferred outflows of resources and deferred inflows of resources related to pensions from the following sources:

	Deferred Outflows of Resources	Deferred Inflows of Resources
Differences between expected and actual experience	\$ (383)	\$ (64,485)
Changes of assumptions	145,587	5,024
Net difference between projected and actual earnings on pension plan investments	251,188	32,096
Changes in proportion and differences between Drinking Water SRF program contributions and proportionate share of contributions	21,828	756
Drinking Water SRF program contributions subsequent to the measurement date of June 30, 2019	445,257	-
Total	<u>\$863,477</u>	<u>\$ (26,609)</u>

The Drinking Water SRF program reported \$445,257 as deferred outflows of resources related to pensions resulting from Drinking Water SRF program contributions subsequent to the measurement date, which will be recognized as a reduction of the net pension liability in the year ending September 30, 2022, of the Drinking Water SRF program's financial

Missouri Department of Natural Resources
Drinking Water State Revolving Fund
Notes to the Financial Statements – Unaudited
Exhibit 6

Note 6: Pension Plan (continued)

statements. Other amounts reported as deferred outflows of resources and deferred inflows of resources related to pensions will be recognized in pension expense in the Drinking Water SRF program's fiscal year following MOSERS' fiscal year as follows:

Plan year ending September 30:

2022	\$204,196
2023	93,203
2024	69,287
2025	24,925
Total	<u>\$391,611</u>

Payables to the Pension Plan

As of September 30, 2021, the Drinking Water SRF program had payables of \$14,606 to MOSERS because of benefits accrued for the September 16, 2021 payroll that were not paid until after this reporting period, but earned during the reporting period.

Note 7: Other Post-Employment Benefits Plan (OPEB)

Plan Description

The Missouri Consolidated Health Care Plan (MCHCP) operates a cost-sharing multiple employer, defined benefit OPEB plan, the State Retiree Welfare Benefit Trust (SRWBT or the Plan). Employees may participate at retirement if eligible to receive a monthly retirement benefit from either the Missouri Employees' Retirement System (MOSERS) or another retirement system whose members are grandfathered for coverage under the Plan by law. The terms and conditions governing postemployment benefits are vested with the MCHCP Board of Trustees within the authority granted under Chapter 103 of the Revised Statutes of Missouri (2000) as amended ("RSMo") 103.003 through 103.178. MCHCP is considered a component unit of the State of Missouri reporting entity and is included in the state's financial report. The Plan's financial statements are available on MCHCP's website at www.mchcp.org/aboutUs/annualReport.asp. The SRWBT does not issue a standalone financial report.

Benefits Provided

The SRWBT was established and organized on June 27, 2008, pursuant to the Revised Statutes of Missouri (2000) as amended ("RSMo") 103.003 through 103.178 to provide health and welfare benefits for the exclusive benefit of current and future retired employees of the state and their dependents who meet eligibility requirements except for those retired

Missouri Department of Natural Resources
Drinking Water State Revolving Fund
Notes to the Financial Statements – Unaudited
Exhibit 6

Note 7: Other Post-Employment Benefits Plan (continued)

members covered by other OPEB plans of the state. MCHCP's three medical plans offer the same, basic coverage such as preventative care, freedom to choose care from a nationwide network of primary care providers, specialists, pharmacies and hospitals, usually at a lower negotiated group discount and the same covered benefits for both medical and pharmacy. Benefits are the same in all three plans, while other aspects differ such as premium, deductible and out-of-pocket costs. Retiree benefits are the same as for active employees. At the participant census date of July 1, 2020, membership information for the entire SRWBT consisted of the following:

Active employees – 38,895

Participants and Spouses in payment status – 21,323

Participants with a deferred benefit – 75

Disabled participants – 76

Note: Membership information for Drinking Water SRF program employees alone is not available.

Contributions

Contributions are established and may be amended by the MCHCP Board of Trustees with the authority granted under Chapter 103 of the Revised Statutes of Missouri (2000) as amended ("RSMo") 103.003 through 103.178. For the fiscal year ended June 30, 2020, employers were required to contribute 4.40 percent of gross active employee payroll toward their required contributions for the period July 1, 2019, through December 31, 2019, 4.65 percent for the period January 15, 2020 through April 1, 2020, and 4.02 percent for the period April 15, 2020, through June 1, 2020, and 3.41 percent for the period June 1, 2020 through June 30, 2020.

Contributions to the OPEB plan from the Drinking Water SRF program were \$4,021 for the fiscal year ended September 30, 2021.

OPEB Liabilities, OPEB Expense, and Deferred Outflows of Resources and Deferred Inflows of Resources Related to OPEB

At September 30, 2021, a liability was reported of \$151,850 for the Drinking Water SRF program's proportionate share of the net OPEB liability. The net OPEB liability was measured as of June 30, 2020, and the total OPEB liability used to calculate the net OPEB liability was determined by an actuarial valuation as of that date.

The Drinking Water SRF program's proportion of the net OPEB liability was based on the Department's share of covered payroll in the OPEB plan relative to the covered payroll of the State of Missouri. At June 30, 2020, the Drinking Water SRF program's proportion was 0.0085 percent.

Missouri Department of Natural Resources
Drinking Water State Revolving Fund
Notes to the Financial Statements – Unaudited
Exhibit 6

Note 7: Other Post-Employment Benefits Plan (continued)

For the year ended September 30, 2021, the Drinking Water SRF program recognized OPEB expense of \$6,755. At September 30, 2021, the Drinking Water SRF program reported deferred outflows of resources and deferred inflows of resources related to OPEB from the following sources:

	Deferred Outflows of Resources	Deferred Inflows of Resources
Differences between expected and actual experience	\$4,229	\$(1,316)
Changes of assumptions	-	(7,502)
Net difference between projected and actual earnings on OPEB plan investments	299	(2)
Changes in proportion and differences between employer contributions and proportionate share of contributions	26	-
Employer contributions subsequent to the measurement date	5,430	-
Total	<u>\$9,984</u>	<u>\$(8,820)</u>

\$5,430 reported as deferred outflows of resources related to OPEB resulting from Drinking Water SRF program contributions subsequent to the measurement date will be recognized as a reduction of the net OPEB liability in the year ended September 30, 2022. Other amounts reported as deferred outflows of resources and deferred inflows of resources related to OPEB will be recognized in future years' OPEB expense as follows:

Year ending June 30:

2022	\$(596)
2023	(593)
2024	(636)
2025	(648)
2026	(696)
Thereafter	<u>(1,096)</u>
Total	<u><u>\$(4,265)</u></u>

Actuarial Assumptions

Actuarial valuations for the SRWBT involve estimates of the value of reported amounts and assumptions about the probability of occurrence of events far into the future. The valuation to determine the SRWBT's total OPEB liability is required to be performed at least every two years. The SRWBT valuation is performed annually, but should the valuation not be performed as of the fiscal year end, the total OPEB liability is required to be rolled forward from the actuarial valuation date to the SRWBT plan's fiscal year end. Projections of

Missouri Department of Natural Resources
Drinking Water State Revolving Fund
Notes to the Financial Statements – Unaudited
Exhibit 6

Note 7: Other Post-Employment Benefits Plan (continued)

benefits for financial reporting purposes are based on the substantive plan (the plan as understood by the employer and plan members) and include the types of benefits provided at the time of the valuation and the historical pattern of sharing of benefit costs between the employer and plan members to that point. The actuarial methods and assumptions used include techniques that are designed to reduce the effects of short term volatility in actuarial liabilities and the actuarial value of assets, consistent with the long term perspective of the calculations. The collective total OPEB liability for the June 30, 2020 measurement date was determined by an actuarial valuation as of July 1, 2019, with updated procedures used to roll forward the total OPEB liability to June 30, 2020. This actuarial valuation used the following actuarial assumptions:

Actuarial Assumptions	
Inflation rate	3.00%
Discount rate	4.38%
Projected payroll growth rate	4.00%
Actuarial cost method	Entry age normal, level percentage of payroll
Asset valuation method	Market value

Health care cost trend rate (medical & prescription drugs combined): Non-Medicare is 5.75 percent for fiscal year 2020; the rate decreases by 0.25 percent per year to an ultimate rate of 5.0 percent in fiscal year 2023 and later. Medicare is 10.00 percent for fiscal year 2019 and 2020, 22.00 percent for fiscal year 2021, 10.00 percent for fiscal year 2022 and 2023, 9.5 percent for fiscal year 2024, 9.00 percent for fiscal year 2025, 8.5 percent for fiscal year 2026, and 8.00 percent for fiscal year 2027; the rate then decreases by 1.00 percent per year to an ultimate rate of 5.00 percent in fiscal year 2030 and after.

Mortality: RP-2016 for Employees/Annuitants without collar adjustments using Scale MP-2016. The last experience study was conducted in 2020. Termination rates and retirement rates are updated based on an experience study conducted in 2020. Participation and dependent coverage assumptions were updated based upon an experience study conducted in July 2020. Per capita claims costs, administrative expenses and retirees contributions were updated based on analysis of 2021 rates.

Long-Term Expected Rate of Return

The target allocation and best estimates of arithmetic real rate of returns for each major asset class are listed in the following table:

**Missouri Department of Natural Resources
Drinking Water State Revolving Fund
Notes to the Financial Statements – Unaudited
Exhibit 6**

Note 7: Other Post-Employment Benefits Plan (continued)

Asset Class	Target Allocation	Expected Real Return
Large cap stocks	17.0%	8.5%
Mid cap stocks	6.0%	8.8%
Small cap stocks	7.0%	8.8%
High-yield bonds	4.0%	8.9%
BarCap aggregate bonds	64.0%	2.4%
Cash equivalents	2.0%	2.1%

Discount Rate

A discount rate of 4.38 percent was used to measure the total OPEB liability. The projection of cash flows used to determine the discount rate assumed that contributions from plan members will be made at the current member contribution rates and the contributions from employers will be made at statutorily required rates, actuarially determined. This discount rate was determined as a blend of the best estimate of the expected return on plan assets and the 20-year high quality municipal bond rate as of the measurement date. For years where expected benefit payments can be covered by projected trust assets, expected returns are used. For years where payments are not expected to be covered by trust assets, the municipal Bond Buyer 20-Bond General Obligation Index rate is utilized.

Sensitivity of the Drinking Water SRF Program's Proportionate Share of the Net OPEB Liability to Changes in the Discount Rate

As required by GASB Statement No. 75, the following table presents the Drinking Water SRF program's proportionate share of the net OPEB liability, calculated using a discount rate of 4.38 percent, as well as what the proportionate share of the net OPEB liability would be if it were calculated using a discount rate that is one percent lower or one percent higher:

	1% Decrease in Discount Rate (3.38%)	Current Discount Rate (4.38%)	1% Increase in Discount Rate (5.38%)
Drinking Water SRF Program's Proportionate Share of the Net OPEB Liability	\$182,004	\$151,850	\$128,226

**Missouri Department of Natural Resources
Drinking Water State Revolving Fund
Notes to the Financial Statements – Unaudited
Exhibit 6**

Note 7: Other Post-Employment Benefits Plan (continued)

Sensitivity of the Drinking Water SRF Program's Proportionate Share of the Net OPEB Liability to Healthcare Cost Trend Rate

The following presents the Drinking Water SRF program's proportionate share of the net OPEB liability calculated using assumed trend rates, as well as what the Drinking Water SRF program's proportionate share of net OPEB liability would be if it were calculated using a trend rate that is 1-percentage-point lower or 1-percentage-point higher:

	1% Decrease in Trend Rates	Current Trend Rates	1% Increase in Trend Rates
Drinking Water SRF Program's Proportionate Share of the Net OPEB Liability	\$127,794	\$151,850	\$182,577

Note 8: Net Position

The net position of the program is all restricted. The program's enabling legislation and related regulations require that all money in the fund be used only for purposes of the program. The program is capitalized by grants from the EPA, authorized by Section 1452 of the SDWA, and matching funds from the State of Missouri. As of September 30, 2021, the EPA has awarded capitalization grants totaling \$436,116,331 of which \$367,783,433 has been drawn. During 2013, \$18,500,000 of capitalization grant funds were transferred to the Clean Water SRF program. The in-kind amounts of \$1,444 on the FS997629-00, \$100,000 each for the FS997629-06 and FS997629-08 grants, and \$74,397 for the FS997629-11 grant are not available to be drawn. The adjusted award amount after subtracting the transfer and in-kind amounts totaled \$417,340,490. Also, in 2014, \$5,000 was rescinded from the grant.

Total	\$417,340,490	\$355,444,667	\$12,338,767	\$367,783,433	\$49,557,057

*This table reflects adjusted grant amounts as detailed in the paragraph above.

**Missouri Department of Natural Resources
Drinking Water State Revolving Fund
Notes to the Financial Statements – Unaudited
Exhibit 6**

Note 8: Net Position (continued)

As of September 30, 2021, state matching contributions were as follows:

	Sept. 30, 2020	2021 Contribution	Sept. 30, 2021
State Appropriations	\$15,504,549	\$ -	\$15,504,549
State Match Bonds (sold by EI ERA)	39,069,400	3,207,197	42,276,597
State Match Administration Fee	10,906,203	675,003	11,581,206
Rural Water Grants	7,085,242	-	7,085,242
Total State Match	<u>\$72,565,393</u>	<u>\$3,882,200</u>	<u>\$76,447,594</u>

The state match bonds sold by EI ERA are being repaid with Drinking Water SRF program interest earnings and are not contributions to fund equity. The state match provided by the Rural Water Grants are not contributions to fund equity as these grants were funded by proceeds from Missouri state bond sales prior to 2012. The state match from administration fees is a contribution to loan fund equity.

Note 9: Set-Aside Costs

The Federal SDWA allows states to reserve, or “set aside” up to 31 percent of the capitalization grant to implement and maintain activities to help public water systems provide safe drinking water to the public. The SDWA establishes four categories of set-asides and sets a maximum amount for each. In FFY 2020, the Department reserved 31 percent of the FFY 2021 grant for set-aside activities.

Set-Aside Capitalization Grant Balances

The following capitalization grants have balances available to draw for set-aside activities that are detailed by set-aside category of available funding.

Grant	Program Administration and Technical Assistance	Small System Technical Assistance	Public Water System Supervision	Local Assistance and Other State Programs	Total Funds Available
2018	\$ 314	\$ -	\$ 141	\$ -	\$ 455
2019	118	1,954	251,145	37,686	290,903
2020	656,803	388,082	1,939,354	2,769,904	5,754,143
2021	775,760	387,880	1,939,400	2,909,100	6,012,140
Total	\$1,432,995	\$777,916	\$4,130,040	\$5,716,690	\$12,057,641

Notes to the Financial Statements – Unaudited
Exhibit 6

Note 10: Contingencies

The program is exposed to various risks of loss related to torts, theft of assets, errors or omissions, injuries to state employees while performing program business, or acts of God. The program maintains insurance through the State of Missouri for all risks of loss, which is included in the indirect costs allocated to the program. There have not been any claims against the program since its inception in 1997.

Note 11: Subsequent Events

Governor Parson announced a commitment to offer grants from the State American Rescue Plan Act allocation for water infrastructure improvements, and will present his plan to the General Assembly at his State of the State address in January 2022. The grants will be administered by the Department's Financial Assistance Center.

President Biden signed the Bipartisan Infrastructure Law on November 15, 2021. The law includes a \$50 billion five year investment to strengthen the nation's drinking water and wastewater systems. The majority of the water infrastructure dollars will flow through the SRF. Missouri's estimated 2022 state allotment is \$147,152,000.
